5 Use, conditional. ~~The term "conditional use" means a use, because of characteristics peculiar to it, or~~  
6 ~~because of size, technological processes, or type of equipment, or because of the exact location with~~  
7 ~~reference to surroundings, streets and existing improvements or demands upon public facilities, requires~~  
8 ~~a special degree of control that mitigates or eliminates any detrimental impacts the use might have on the~~  
9 ~~county, surrounding neighbors, or adjacent land uses and makes such uses consistent and compatible~~  
10 ~~with other existing or permissible uses in the same districts, and assures that such uses shall not be~~  
11 ~~adverse to the public interest. "Conditional use" means a land use that, because of its unique~~  
12 ~~characteristics or potential impact on the county, surrounding neighbors, or adjacent land uses, may not~~  
13 ~~be compatible in some areas or may be compatible only if certain conditions are required that mitigate or~~  
14 ~~eliminate the detrimental impacts.~~

102 **CHAPTER 4. - CONDITIONAL USES**

103

104 **Sec. 108-4-1. - Purpose and intent.**

105 (a) The purposes of this Chapter are to:

108 applied by the Land Use Authority to a use listed as a conditional use in this Land Use Code;  
109 and

112 (b) The intent of providing conditional use regulations is to provide allowance for additional uses in each  
113 zone and give the Land Use Authority flexibility in applying reasonable conditions to effectively  
114 manage unique characteristics or detrimental effects of those uses, on a case by case basis.

124 ~~conditional use may be deemed incompatible in some areas.~~

**Comment [c17]:** Examples of conditions for mitigation may include any reasonable method of fire hazard avoidance or fire fighting, including, but not limited to: coordination and cooperation with the local fire authorities, site design and layout; building, structure, or other facility design and layout; defensible space; ingress and egress; emergency evacuation; fire fighting facilities; fire flow capacity; fire apparatus access; fire fighting staging; and other related fire hazards mitigation as authorize by local, state, and federal laws.

**Comment [c18]:** Examples of conditions for mitigation may include coordination and cooperation with the fire and EMS agencies, and compensation for the need for additional fire and EMS presence beyond typical service levels.

**Comment [c19]:** Examples of conditions for mitigation may include coordination and cooperation with the Sheriff's Office, and compensation for the need for additional Sheriff's Deputy presence beyond typical service levels.

**Comment [c20]:** Examples of conditions for mitigation may include appropriate design, construction, and location of structures, buildings and facilities.

**Comment [c21]:** This standard is intended to be the "umbrella" standard to catch what the others do not. Much more difficult to track the outcomes, and the resulting conditions are going to be more difficult to defend without really good findings, but it may be useful when a proposal is presented that other standards do not catch.

**Comment [c22]:** Examples of conditions for mitigation: this may include provision for, relocation of, or protection of infrastructure or amenities. Mitigation may take into consideration the existing and, if applicable, proposed configuration and size of streets, driveways, driveway and parking lot approaches, parking lots and/or parking spaces, and pedestrian pathways. Mitigation may also consider peak traffic demands, and other applicable infrastructure constraints.

**Comment [c23]:** Examples of conditions for mitigation may include the provision for infrastructure or amenities for the reduction of vehicle and pedestrian conflicts; the provision of sufficient space for loading and unloading; the provision of sufficient space and access to waste collection facilities; and the provision for additional parking lot standards beyond those required in Section 108-8, including, but not limited to, number of parking spaces, parking space dimensions, parking lot isle dimensions, parking lot isle and driveway connections and configuration, and cross access easements or agreements for adjacent properties.

- 337 h. Mitigate material degradation of the level of service, functionality, capacity, or usability of  
 338 the existing open spaces, public features, or recreational amenities in the area, and, if  
 339 applicable, adequately provide additional open spaces, public features, or recreational  
 340 amenities.
- 341 i. Mitigate any disproportionate demand for government services, generally.
- 342 (3) Standards relating to the environment.
- 343 a. Mitigate detrimental effects on the natural features of the site, and the surrounding affected  
 344 areas, if credible evidence of such a detrimental effect is present; including, but not limited  
 345 to, rivers and creeks, lakes, ponds, reservoirs, wetlands, drainage ways, ground water  
 346 protection, and slopes.
- 347 b. Mitigate detrimental effects on the natural environment of the site, and the surrounding  
 348 affected areas, if credible evidence of such a detrimental effect is present; including, but  
 349 not limited to, wildlife, air quality, water quality (including erosion control), local natural  
 350 resources, natural vegetation (including protection against noxious or invasive species),  
 351 and wildland areas.
- 352 (4) Standards relating to the **current qualities and characteristics** of the surrounding area and  
 353 compliance with the intent of the general plan.
- 354 a. Provide buffering, screening, or fencing of the use or site, or provide other landscape  
 355 features, sufficient to mitigate the proximity of incompatible uses, objectionable site  
 356 features, and disharmony with existing and future land uses in the area.
- 357 b. Provide hours of operation appropriate for the general nature and character of existing land  
 358 uses in the area to mitigate conflict or incompatibility with surrounding uses.
- 359 c. Provide reclamation, restoration, clean-up, or beautification of the site as the use evolves,  
 360 or as the use is terminated, in order to mitigate aesthetic and nuisance effects.
- 361 d. Mitigate nuisance factors including, but not limited to, light and glare, noise, vibrations,  
 362 smoke, dust, dirt, odors, gases, noxious matter, heat, electromagnetic disturbances, and  
 363 radiation, if credible evidence of such a nuisance is present.
- 364 e. Mitigate detrimental effects of the use considering the combined effect of it and other main  
 365 uses on the property.
- 366 f. To the extent supported by law, mitigate other general detrimental effects in a manner that  
 367 sustains the objectives and intentions of the County's general plan, future land use map (or  
 368 proposed land use map), and this Land Use Code.
- 369 (5) Standards Relating to Performance.
- 370 a. Mitigate potential noncompliance or poor performance by providing appropriate  
 371 performance measures, including, but not limited to, completion or performance bonds,  
 372 completion agreements, and development agreements.
- 373 b. Mitigate potential noncompliance or poor performance by requiring regular review or

 378 generally, if credible evidence of such negative effects is present.
- 379 b. Provide appropriate mitigation of detrimental effects as required in standards found  
 380 elsewhere in this Land Use Code in a manner that complies with this Land Use Code, and  
 381 any other federal, state, or local regulation, as may be applicable.

**Comment [c24]:** There can be a lot of subjectivity in this determination. Stick to the facts. Try not to be tempted to deny a permit because it does not comply with your interpretation of this. Try not to use this to overdesign the proposal so much that it is cost prohibitive. Instead, find reasonable ways to help the proposal fit in better. Look to existing design features in the area. Look to the design review standards for help. Strengthen the design review standards if necessary.

**Comment [c25]:** Rather than denying an application because "it doesn't fit," help it fit by requiring these types of site features.

382 ~~(4)~~(7) Voluntary contributions providing satisfactory compliance with applicable standards.  
383 When considering a conditional use the Land Use Authority has discretion to determine  
384 satisfactory compliance with any applicable standard, requirement, provision, or restriction of  
385 this Chapter if the applicant has voluntarily offered a more desirable alternative to mitigate the  
386 reasonably anticipated detrimental effects of the use than those otherwise specified here. The  
387 Land Use Authority may require a development agreement to execute the voluntary alternative.
