

Freedom Ranch LLC-#7704-Accessory-Structure

Narrative

This proposed structure is a 5120 sq ft pole building that is going to be used for personal storage. The items being stored are listed as follows;

Farm Equipment, lot maintenance equipment, utility vehicles, recreation vehicles, classic vehicles, motorcycles.

Sometime in the future, there are hopes of using a portion of the building as a basketball court and golf simulator. At this time there is no detailed plan for that.

There is currently no plan to add any additional parking, as the building itself is housing the vehicles on the property, and there will be no additional landscaping around the structure.

This structure will not have living space, will not be used as an ADU, and will not be used for any commercial services.
