1. Is the SWPPP on site and accessible, or is the SWPPP location posted in an obvious place and reasonably accessible (in a short time)? 2. Are sender control, sediment control, and good housekeeping BMPs installed on the site as shown in the SWPPPP? 3. Has the SWPPP been updated to reflect the current site conditions (modifications dated as finitiated on site map, new BMPs on site map, discontinued MMPs crossed off site map, new BMP details & specify in SWPPP, SWPPP amendment Log, etc.)? 4. Are or-site inspections being preferred and recorded by a qualified person on a westy or threely basis, reporting items required by permit? (inspector arms depaillications, weather, problems/repails, corrective action, new BMPs, removed BMPs, discharges, etc.) 5. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, sitil fence, progradant broundary diversion, down gradient broundary sediment control, etc.) 1. Is there evidence of sediment discharge such as must flows or soil deposits from the construction site in downstream locations? 1. Is there evidence of sediment discharge such as must flows or soil deposits from the construction site in downstream locations? 1. Is there evidence of sediment discharge such as must flows or soil deposits from the construction site in downstream locations? 1. Is there soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a long stream of the construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a long stream of the properties, described and stream of repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, intel protection, waitles, the ball, or the sed of repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction material, ball and protec	I Inspecto	or Code (circle): 1 Type Code (circle): 1/2 Municipal) 2 - Industrial 2 Code	
2. Are erosion control, sediment control, and good housekeeping BMPs installed on the site as shown in the SWPPP? 3. Has the SWPPP been updated to reflect the current site conditions formations desired in sitemap, new BMPs on site map, discontinued BMPs crossed off site map, new BMP details & species in SWPPP, SWPPP amendment Log, etc.)? 4. Are on-site inspections being preferred and recorded by a qualified person on a weekly or bitmekly basis, reporting items required by permit? (inspection are expected action litems from previous inspections been addressed and documented within the line frame allotted by the inspector? 5. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silt fence, aggraded the boundary sediment control, etc.) 6. It is there evidence of sediment discharge such as multi-flows or soil deposits from the construction site in downstream locations? 7. Is there evidence of sediment discharge such as multi-flows or soil deposits from the construction site in downstream locations? 8. Is there evidence of vehicles tracking soil of the construction site? 9. Is there evidence of vehicles tracking soil of the construction site? 9. Is there evidence of vehicles tracking soil of the construction site? 9. Is there evidence of vehicles tracking soil of the construction site? 9. Is there are evidence of vehicles tracking soil of the construction site? 9. Is there are evidence of vehicles tracking soil of the construction site? 9. Is there are for the perit, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, and the control, etc?) 9. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, and the foreign support of the construction activities for 14 to 21 days without stabilization? (except sony or force ground)? 9. Are there places where BMPs are needed and sho			NO
3. Has the SWPPP been updated to reflect the current site conditions (modifications dated & initialed on site map, new BMPs on site map, discontinued BMPs crossed of site map, new BMP details & specify in SWPPP, SWPPP amendment Log, etc.)? 4. Are on-site inspections being performed and recorded by a qualified person on a weekly or biweekly basis, reporting items required by permit? (inspector manne & qualifications, weather, problems/regals), corrective action items from previous inspections been addressed and documented within the time frame altoted by the inspector? 5. Have all corrective action items from previous inspections been addressed and documented within the time frame altoted by the inspector? 5. Have all corrective action items from previous inspections been addressed and documented within the time frame altoted by the inspector? 5. Have all corrective action items from previous inspections been addressed and documented within the time frame altoted by the inspector? 5. Have all corrective action items from previous and flows or soil deposits from the construction site indownstram locations? 6. It is there evidence of vehicles tracking soil of the construction site? 7. It is there evidence of vehicles tracking soil of the construction site? 8. It is there a need to repair, maintain, or improve actiment control BMPs (itemporary stabilization, ension blankets, mulch, vegetated strips, fip rap, surface upughening, pipe slope drain, dust control, etc.)? 7. It is there a need to repair, maintain, or improve actiment control BMPs (silt fence, check dams, fiber roils, sediment trapbiasin, litelt protection, wattles, trave balls, cuto brothack, etc? 8. It is the real need to repair, maintain, or improve actiment control BMPs (silt fence, check dams, fiber roils, sediment trapbiasin, litelt protection, wattles, trave balls, cuto brothack, etc.? 8. It is the real instance of the protection o	. Is the SWPPP on site and accessible, or is the	he SWPPP location posted in an obvious place and reasonably accessible (in a short time)?	1
MM's crossed off site map, new BMM's details & spec's in SWPPP, SWPPP amendment Log, etc.)? Are on-site inspections being performed and recorded by a qualified person on a weeky obsists, reporting items required by permit? (inspector arms exqualifications, weather, problems/repairs, corrective action, new BMPs, removed BMPs, discharges, etc.) Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, slit fence, gradient boundary diversion, down gradient boundary sediment controls, etc.) Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there seed to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface supplement, pipe slope drain, dust control, etc)? Is there are for trapit, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface supplement, pipe slope drain, dust control, etc)? Is there are for trapit, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface supplement, temporary or trapits, curb curback, etc?) Is there are for trapit, maintain, or improve erosion control BMPs (temporary stabilization) for the properties staked down, fueling areas, concrete wash out area, proper curb ramps, spill prevention, etc?)
