		Estimated Start Date ASAP	Actual Start Date ASAP	

Submittal Checklist

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.

Site Plan: The date that the applicant submits a site plan application or amended site plan.

Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.

Land Use Permit: The date that the applicant submits a land use permit application.

Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-construction meeting is required before performing any on-site earth work, unless waived by the county engineer.

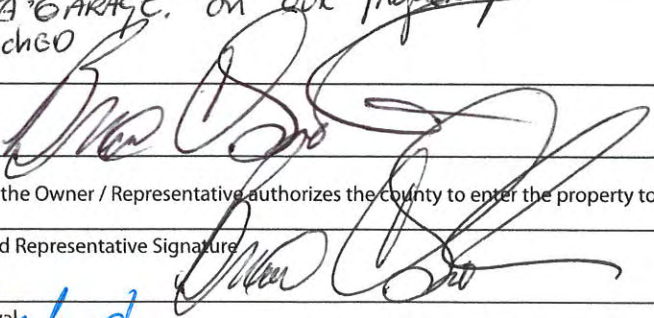

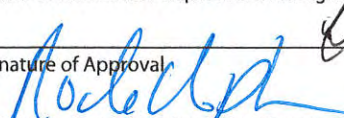

Applicant Narrative

Please explain your request.

**wanting a Building Permit so we can start
a GARAGE. on our property.
detached**

Signature of Approval 	Date 8-25-15

Brian C. Snoke
2313 E. 6825 N.
Liberty, UT 84310

SWPPP Questions Answered

1. How much area will be disturbed?
3,000 sq ft
2. Who will be responsible for the conditions of the site during construction?
Brian C. Snoke
3. What will be done to prevent the neighbors from being affected by the proposed construction activities?
See attached drawing. There is a vacant lot above us, and we've created a berm to divert runoff water from their lot to ours.
4. What will be done with all excavated material temporarily and permanently?
Excavated materials have been hauled off-site. Any materials needed to back-fill will be brought in.
5. Where is the concrete washout and how will it be maintained?
See drawing. It will be a hole lined with 20 mil poly and then removed when hardened.
6. Where are the porta-johns located and how are they installed.
See drawing. It will be a freestanding porta-john and will be secured with re-bar anchors.
7. How will the construction entrance be built and where will it be located?
See drawing. The entrance will be an existing driveway.
8. What will you do when mud and/or dirt gets tracked on the asphalt.
See drawing. There is a clean-off area located in a gravel area of property for any clean up.
9. Is there a drainage ditch or swale on or near your property? How will it be protected?
Yes, there is a natural run-off ditch behind the property. Protected by dirt berm and rock.
10. What currently happens to the rain/storm water when it reaches this project site?
It soaks into the property and/or runs into the natural run-off ditch.
11. Show all existing occupation on the property.
See drawing.
