Are sur-latin persolence and set in any, new Serier details is special in SVPPP. SVPPP amendment Log, etc.)? Are or-nation improved suppressions being performed and recorded by a qualified person on a weekly or beweekly basis, reporting items required by permit? (Inspector? Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, sill fence, progradent boundary diversion, down previous inspections been addressed and documented within the time frame allotted by the Inspector? Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, sill fence, progradent boundary addressed and documented within the time frame allotted by the Inspector? Are SW flows entering and leaving the construction site or diverted around the site? (e.g. perimeter controls, berms, sill fence, are evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations? Is there a related for repair, maintain, or improve sersion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface upderling, person deposits, maintain, or improve sediment control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface upderling, get person framents, controlled by the surface of repair, maintain, or improve sediment control BMPs (till fence, check dams, fiber rolls, sediment traphasin, intel protection, wattles, and believe the date of repair, maintain, or improve sediment control BMPs (till fence, check dams, fiber rolls, sediment traphasin, intel protection, wattles, and believe the date what leaves the control by the surface of repair, maintain, or improve sediment control BMPs (till fence, check dams, fiber rolls, sediment traphasin, intel protection, wattles, and the surface of repair maintain, or improve sediment control BMPs (till fence, check dams, fiber rolls, sed	2. Are erosion control, sediment control, and good housekeeping BMP's installed on the site as shown in the SWPPP? 3. Has the SWPPP been undated to reflect the current site conditions (modifications dated & islanded as a like some on the site of	X		
Are on-tall inspections being performed and recorded by a qualified person on a weakly or biweelity basis, reporting items required by permit? (Inspector and Equalifications, weather, problem/sepais, concretive action, new Map., removed BMPs, discharges, set.) Have all corrective action Items from previous inspections been addressed and documented within the time frame alloted by the inspector? Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g., perimeter controls, berms, silk fence, gradent boundary diversion, down gradient boundary sediment control, etc.) Is there evidence of vehicles tracking soil off the construction site? Is there are sed, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a orm drain or water body? Is there a need to repair, maintain, or improve erosino control BMPs (emporary stabilization, erosino blankets, mulch, vegetated strips, fip rap, surface updering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber rolls, sediment traphasin, intel protection, wattles, awa balls, curb curb-lock, etc?? Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, are need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, are need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, are need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, are need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, are need to repair, maintain, or improve good housekeeping controls (clean track out pad, s	IDMP'S crossed off site map, new BMP details & spec's in SWPPP. SWPPP amendment Log letc 12	14		
Have all corrective action thems from previous inspections been addressed and documented within the time frame alloted by the inspector? Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g., perimeter controls, berms, sit fence, gradient boundary diversion, down gradient boundary sediment control, etc.) Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there are offer the body? Is there are need to repair, maintain, or improve acrosson control BMPs (learnporary stabilization, erosion blankets, mulch, vegetated strips, fip rap, surface updering, people offain, dust control, etc)? Is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment traphasin, intel protection, wattles, awa balls, cuto burdoek, etc?? Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, and a strip of the protection of th	4. Are on-site inspections being performed and recorded by a qualified person on a weekly or biweekly basis, reporting items required by personal discountries.	-		\vdash
Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silt fence, progradient boundary diversion, down gradient boundary sediment control, etc.) Is there evidence of veinides tracking soil off the construction site? Is there evidence of veinides tracking soil off the construction site? Is there evidence of veinides tracking soil off the construction site? Is there soil, construction material, landscaping items, or other debth's filled on impervious surfaces (roads, drives) that could be washed with SW to a orm drain or water body? Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface uplehering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface uplehering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface uplehering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization), or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrate house), or the control, provided and stabilization repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrate house, or provided area should be removed to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrate house, entrated area to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrated or pagin, maintain, or improve erosion controls of pagin area to repair, maint	5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?	15		_
Is there evidence of sediment discharge such as much flow or soil deposits from the construction site in downstream locations? Is there evidence of sediment discharge such as much flow or soil deposits from the construction site in downstream locations? Is there evidence of vehicles tracking soil of the construction site? Is there evidence of vehicles tracking soil of the construction site? Is there a read to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, much, vegetated strips, fip rap, surface uphering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve sediment control BMPs (temporary stabilization, erosion blankets, much, vegetated strips, fip rap, surface uphering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve sediment control BMPs (temporary stabilization, erosion blankets, much, vegetated strips, fip rap, surface uphering, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve sediment control BMPs (slit fence, check dams, fiber roils, sediment traphasin, inlet protection, wattles, and ball, control, etc.)? Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, etc.). Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, etc.). Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, etc.). Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, etc.). Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, etc.). Is there alsatched areas that have not had a stability and that the decision. If appropriate, describe fo	6. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (a.g. perimeter controls, berms, silt faces	_		├-
Is there evidence of vehicles tracking soil off the construction site? Is there soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a commod rain or water body? Is there a need to repair, maintain, or improve acrosin control BMPs (iemporary stabilization, erosinn blankets, mulch, vegetated strips, fir pap, surface upheling, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve acdiment control BMPs (slit fence, check dams, fiber rolls, sediment traphasin, inlet protection, wattles, aw balls, or the check chack, etc? Is there a need to repair, maintain, or improve acdiment control BMPs (slit fence, check dams, fiber rolls, sediment traphasin, inlet protection, wattles, aw balls, or the check chack, etc? Is there a need to repair, maintain, or improve acdiment control BMPs (slit fence, check dams, fiber rolls, sediment traphasin, inlet protection, wattles, aw balls, or the chack down, fulling areas, concrete wash out area, proper curb ramps, split prevention, etc)? Is there a need to repair, maintain, or improve acdiment control BMPs (slit fence, check dams, fiber rolls, sediment traphasin, inlet protection, wattles, aw balls, or the chack while the chack without stabilization? (accept snow or frozan ground)? Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (accept snow or frozan ground)? COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE Individual traphasing the problem and its location. If appropriate, describe (in general terms) what needs to be completed. However, only fausified (a.g., you are a designer) should you be mandating specific BMPs to traphasing the problem and its location. If appropriate, describe (in general terms) what needs to be completed. However, only fausified and acceptance of the problem and its location. It appricable SEV codes: Location of the problem and its location. It appropriate, describe (upgradient boundary diversion, down gradient boundary sediment control, etc.)	K.		
Is there soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a wind rain of washed with SW to a wind rain of the process of the	7. Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations? 8. Is there evidence of vehicles tracking soil off the construction site?		X	
It is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface uphening, pipe slope drain, dust control, etc)? It is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber rolls, sediment trapbasin, inlet protection, wattles, aw bails, curb cut-back, etc? It is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrash control, port-o-potities staked down, fueling areas, concrete wash out area, proper curb ramps, spill prevention, etc)? Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)? Are there places where BMPs are needed and should be installed or not needed and should be removed? COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE Initially the problem and its location. If appropriate, describe (in general terms) what needs to be completed. However, only I qualified (e.g., you are a designer) should you be mandating specific BMPs to install.
