			Actual Start Date	

Submittal Checklist

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.

Site Plan: The date that the applicant submits a site plan application or amended site plan.

Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.

Land Use Permit: The date that the applicant submits a land use permit application.

Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-costruction meeting is required before performing any on-site earth work, unless waived by the county engineer.

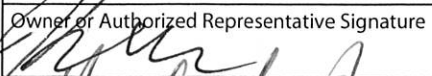

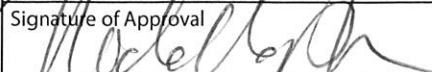

Applicant Narrative

Please explain your request.

To build house, see narrative.

Authorization

By signing below the Owner / Representative authorizes the county to enter the property to perform inspections.

Owner or Authorized Representative Signature 	Date 4/29/2016
Signature of Approval 	Date 5-6-16

Kevin & Josie Erskine
2670 North Sierra Drive
Eden, Utah 84310
Lot 39
Page 1 of 3

All utility locations curb and gutter locations, etc. to be provided by others.

Placement of home on lot shall comply with local City Zoning Requirements, and with Recorded Subdivision Plat.

See site plan for approximate area of disturbance (approximately 2916 sqft).

Kevin & Josie Erskine (owners), in conjunction with Rick Souza (General contractor), shall be responsible for site conditions during construction.

Noise pollution reduction and minimal traffic shall reduce or prevent neighbors from being affected by the proposed construction activities.

Excavated material will be left on site during construction to backfill around home and until final landscaping is done.

See site plan for approximate location of concrete washout. Concrete washout will consist of pit lined with plastic & bermed. If pit becomes full, it will be cleaned out and removed.

See sight for approximate location of porta-john. Porta-john is to be staked down.

Construction entrance will line up with driveway approach & have a track out pad.

If mud is tracked onto asphalt, it will be swept and removed.

Drainage on property slopes slightly to the back of the property. Water in the gutter/swale will run south west. All storm water and dirt will be kept on site during construction until final construction is done.

The grade away from foundation walls shall fall a minimum of 6 inches within the first 10 feet (5%).

Gravel bags to be placed and maintained around any storm drain inlet adjacent to or immediately downstream from site during construction.

There is currently no existing occupation on the property.
