**SURVEYOR'S CERTIFICATE**  
I, Ernest D. Rowley, do hereby certify that I am a professional land surveyor in the State of Utah and hold license no. 171781-2201 in accordance with Title 58, Chapter 22 known as the Professional Engineers and Professional Land Surveyor's Licensing Act, have made a survey of the property(s) shown hereon in accordance with UCA 17-23-17, verifying measurements, and placing monuments as represented. That this plat was prepared from the field notes and from documents and records as noted hereon. I further certify that, to the best of my knowledge and belief, all lots meet the current requirements of the Zoning Ordinance of the county.

**NARRATIVE**  
The purpose of the survey is to amend Lot 20, Amended Willow Wood Subdivision No.4 and add a strip of land approximately 30 feet wide, east to west, on the west of Lot 20 into this plat. In the progress of the survey the property owner intends to convey a small parcel (shown hereon as Parcel 1) to the owner of Lot 19. This parcel is on the south of the existing canal and is unusable to the owner and benefits the owner of Lot 19. Also, there is a common bridge that the owners of Lots 20 and 21 use to access their property and homes but this bridge and the associated driveway do not have a legal easement for the parties to utilize the property of each other for ingress and egress. Therefore, part of this project is to create a description that can be used to create an easement on Lot 21 and the purpose of the owners dedication is to create an easement for ingress and egress as well as utility purposes on Lot 23 (old lot 20) as shown.  
The basis of bearing is as noted in the boundary description. The location of the amended subdivision plat needed to be rotated and translated slightly to conform to the location of found points for Lot 21. I was not able to find a record of survey on the county web site for this survey, however, one cap was stamped as Pinnacle Eng. The nails found were held for the location of Lot 20 which also matches existing fencing of the lots fairly well. The location of Willow Wood No.2 as evidenced by existing fencing places a rotation and translation on that plat which is different from the surveyed and occupied location of Amended Willow Wood Subdivision No.4. The difference is noted here on as a 1.2' gap. This was determined by the location of fencing representing the lot boundaries which most are not shown on this plat since said No.2 was not really part of this amendment. The record plats do show that the plats intended to be adjoining plats but because it appears that they are not additional work would need to be done on the south boundary to close the gap which is not necessary in this project.  
The parcel that is being added to this plat is identified by tax number 15-161-0002 as a combined parcel for tax purposes and is described as adjoining the quarter section line. I have held the monumented location for the quarter section line in this plat. There is a difference between this monumented location and an old fence line of about 1/2 foot. It is possible that the old fence was the physical evidence of the quarter section line but has not been held for the development of the subdivisions in this area.  
Mr. Clarke showed us the location of the two nails that are shown hereon and the Pinnacle rebar. Other than the section corner monuments no other monuments were found. The location noted as Fence corner 1 is a place that the property owner, Richard Smith, of parcel number 15-151-0007 & 15-078-0074 indicated that the original stake for the corner was set within "about a foot or so" of where the post is. It is obvious from the platting of the subdivisions that the old fence (Fence 1) was not used for the boundary of the subdivision lots.
