Submittal Checklist

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.
Site Plan: The date that the applicant submits a site plan application or amended site plan.
Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.
Land Use Permit: The date that the applicant submits a land use permit application.
Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-construction meeting is required before performing any on-site earth work, unless waived by the county engineer.

Applicant Narrative

Please explain your request.
addition to single family Dwelling

LOT #17
(Rasmussen)

LOT #18
(Messenly)

Lot #1

Lot #2

465'
(paved)

Concrete Wash-out Pit
(Lined with visqueen)

Home occupied

affected area

Pontar-John

EXT - Elevation within 2" in affected area

Construction Entrance

500's

500's

- 1- How much area will be disturbed
 - Approx - 6,500 S-FT
- 2- Who will be responsible for the conditions of the site during construction
 - John Benstog (801)-391-7497
- 3- What will be done to prevent the neighbors from being affected by the proposed const activities
 - There won't be any neighbors in close proximity, but will take all measures to limit any affects on neighbors, I have worked under SWPPP permits on state and federal jobs and have very good track record.
- 4- What will be done with all excavated temporarily and permanently
 - Extra fill will be going to the neighbors around the corner, the remainder will be stacked in single pile on site, and kept damp to prevent dust

5. Where is the concrete washout and how well it be maintained
Concrete washout is in N-E corner of affected area, it will be a pit lined with visqueen, I make it a point to always clean out concrete shoots, ect to minimize excess concrete

6. Where are porta-johns located and installed

Porta-johns will be located at N-E corner of affected area, tied down with rebar stakes

7. How will the construction entrance be built and where will it be located-

The entrance will be leveled with suitable fill material and located at S-E end of affected area, off of 500'S

8. What will you do when mud/ or dirt gets tracked on the asphalt
Will clean any dirt/ mud off of 500'S, will have trucks that are able wash off tires prior to leaving

9- Is there a Drainage Ditch or
swale on or near your property
- no

10- What currently happens to the
rain/storm water when it reaches
the project site

- it goes into the ground
