

Dan S. Hales

Stormwater Pollution Prevention Plan

3950 N 3175 W

Plain City, Utah 84404

Parcel #19-371-0002

1. How much area will be disturbed
 - a. 3650 Square Feet
2. Who will be responsible for the conditions for the site during construction?
 - a. Own and subcontractors
3. What will be done to prevent the neighbors from being affected by the proposed construction activities?
 - a. There are currently no immediate neighbors. Best judgement will be used to ensure closets neighbors are not affected any more than the occasional vehicle passing by on the road.
4. What will be done with all excavated material temporarily and permanently?
 - a. All excavated material will be reused to grading and landscaping.
5. Where is the concreted washout and how will it be maintained?
 - a. See map for location. Washout will be cleaned as needed by excavator/shovel.
6. Where are the Porta-Johns located and how are they installed?
 - a. See map for location. Units will be portable drop off type.
7. How will the construction entrance be built and where will it be located?
 - a. See map for location. Entrance is built using an 18" corrugated steel pipe, backfilled with soil and covered with road-base.
8. What will you do when Mud and/or dirt gets tracked on the asphalt?
 - a. Nearest asphalt road almost half a mile away. Mud/dirt on the asphalt won't have come from the construction site.
9. Is there a drainage ditch or swale on or near your property? How will it be protected?
 - a. Yes. It will be protected by use of the provided entrance. Construction activities will not otherwise impact the ditch.
10. What currently happens to the rain/storm water when it reaches this project site?
 - a. It nearly all soaks into the ground. What little does not runs down the drainage ditch and into a massive drainage system built by the army corp of engineers.
11. Show all existing occupation on the property.
 - a. None.
