# Echelon Plus<sup>®</sup> Residential & Commercial Aluminum Fence

## Highest Quality in the Industry

Echelon Plus aluminum fencing is the highest quality residential and light commercial ornamental aluminum fence in the industry. Echelon Plus is best known for its remarkable strength which is derived from a unique ForeRunner rail design. The ForeRunner rail allows this aluminum fence system to follow changes in elevation while maintaining security under the fence. The Echelon Plus also has a good neighbor profile, having the look of wrought-iron, but without the required maintenance of old fashioned wrought-iron and unlike traditional aluminum fences that have unsightly screws or rivets.

## Strength From Inside

The strength of the Echelon Plus aluminum fence is derived from its internally reinforced components. The Echelon Plus post has an internal web design that is twice the strength of typical aluminum fence posts and the Echelon Plus rail has an internal reinforcing web that allows the fence to take more abuse than any other ornamental aluminum fence.

## Maintenance Free Finish

Echelon Plus has a maintenance free, durable finish and has a lifetime limited warranty. Echelon Plus aluminum fencing is available in a variety of styles and heights to match any application. Take a look at the features and options in the column at right to find out how our Echelon Plus ornamental aluminum fencing can benefit your projects.

# Pre-Formed Faux Rock Pillars

OUR REPRODUCTION ROCK POSTS LOOK LIKE REAL STONE but are much more resistant to weather, simpler to install, cost less and are easier to maintain. Choose from two different patterns and sizes - River Rock (12" square) and Ledge Stone (21" square). Each can be used in many different applications.

*"If you can't tell the difference, what difference does it make!"™*

## General Features and Specifications:

- Formed with heavy wall MDPE
- Compatible with ALL TYPES of fencing - vinyl to ornamental
- Won't crack or crumble
- No mason required - keep control over your job site
- Impact resistant and durable
- One person installation - no heavy equipment required
- Hundreds of applications
- Can be shipped by UPS

## Here are some possible applications:

- |                      |                  |
|----------------------|------------------|
| • Ornamental Fencing | • Mail Box Posts |
| • Vinyl Fencing      | • Lamp Posts     |
| • Vinyl Railings     | • Sign Pillars   |
| • Ranch Railings     | • Wood Fence     |
| • Aluminum Fences    | • Horse Fence    |
| • Privacy Fences     | • Horse Jumps    |

## River Rock Pattern

### 12" Wide Pillars

- Available in River Rock pattern
- Available colors: Brown, Gray and Rustic Calico
- Can be ordered with a mailbox

Gray

Calico

**Great for Signage!**

Brown

**Pillar**

12" x 12" x 59" high  
(Add 5" for cap)

**Pillar Riser**

12" x 12" x 17 3/8" high  
(Same color as cap)

## Ledge Stone Pattern

### 21" Wide Stackable Pillars

- Available in Ledge Stone pattern
- Available colors: Brown and Gray
- Stack as high as your internal structure will support

Pyramid Cap

Flat Cap

**Main Pillar Section**

21" x 21" x 46" high  
(Add 10 1/2" for pyramid cap and 4" for flat cap)

**Stack Section**

21" x 21" x 15 1/2" high

### Installation

Each pillar can be buried for shorter applications. The pillar is slid over a pre-installed 4 x 4 or other existing post and secured into place by putting additional concrete or gravel inside the pillar. The simulated concrete cap is removable and is designed to accept different lighting applications. Contact us for complete installation instructions.

Specs & Drawings

# TransPort II<sup>®</sup> Sliding Cantilever Gates

## Unique Design

TransPort II is a revolutionary ornamental picket cantilever gate system made up of a three components; frame, façade, & hardware. Because of its unique design the TransPort II can be easily installed without the use of equipment or excess labor. Unlike other enclosed-track cantilever gates, TransPort's standard component design made up of top and bottom track, rigid diagonal braces, and uprights make this gate system rigid and well balanced for simplistic functionality.

## Superior Strength

All members of the TransPort family of cantilever gate products are available for ornamental, chain link, and high security fences. The TransPort is an all weather cantilever sliding gate utilizing an aluminum track extrusion with internal roller assemblies. The gate and track system operate as a single sliding unit. TransPort Cantilever Gates offer superior strength as the track is 60% heavier (by weight) than competitor's extrusions. They contain double track framing, full tracks on top and bottom. Ameristar's double-track cantilevers are available for openings up to 30'. Bi-parting cantilevers are available for openings up to 60'. Pair TransPort with our [gate opener and access control systems](#) for a complete automatic gate solution.
