		Estimated Start Date 05/02/2018	Actual Start Date

Submittal Checklist

- ☒ The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.

Site Plan: The date that the applicant submits a site plan application or amended site plan.

Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.

Land Use Permit: The date that the applicant submits a land use permit application.

Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

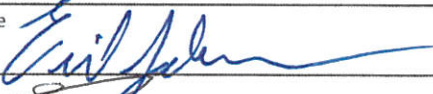

Note: A pre-construction meeting is required before performing any on-site earth work, unless waived by the county engineer.

Applicant Narrative

Please explain your request.
Add to the existing home on the property.

1. Disturbed area 83 acres.
2. ERM Johnson is the Project manager 801-791-1374
3. Earth will be collected in the dumpster and property kept clean.
4. Excavated materials will be piled next to the hole then back filled and graded to code.
5. Concrete walkout is a container from Arrow and will be removed from the site when concrete work is complete.
6. The job is noted on this plan and will be cleaned every day.
7. The construction entrance is located as per this plan and will be made with crushed large gravel.
8. The road will be cleaned when needed.
9. There is no ditch on the property.
10. Storm water ponds through the vegetation and soil because it is not as tall.
11. As noted on the plan.

Note: All storm water and dirt will be kept on site during construction until final landscaping is done.

Note: The grade adjacent to all foundation walls shall fall within 6 inches within the first 10 feet (3% slope). R401.3 Landings, ramps, patios, porches or decks, which are required to be level or can have a maximum slope of 1/4" per foot. All other conspicuous surfaces within 10 feet of the foundation walls must slope a minimum of 1/4" per foot away from walls.
