COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE

Identify the problem and its location. If appropriate, describe (in general terms) what needs to be completed. However, only if qualified (e.g., you are a designer) should you be mandating specific BMPs to install. Include the date when corrections are made.

The swppp doesn't have all the required information on it.

It appears that someone is doing inspections/observations. It might be useful to use a form to check specific items.

The inlet protection appears to be broken, and might be leaking some gravel into the stormdrain.

The notes appear that they want to file for an NOT, but the site has not reached the revegetation requirements, so it's not eligible for NOT yet.

They may have sodded it since the county went out for the inspection, at the time of the note it was not vegetated.

Inspector, please list all applicable SEV codes:
