Submittal Checklist

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.

Site Plan: The date that the applicant submits a site plan application or amended site plan.

Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.

Land Use Permit: The date that the applicant submits a land use permit application.

Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-construction meeting is required before performing any on-site earth work, unless waived by the county engineer.

Applicant Narrative

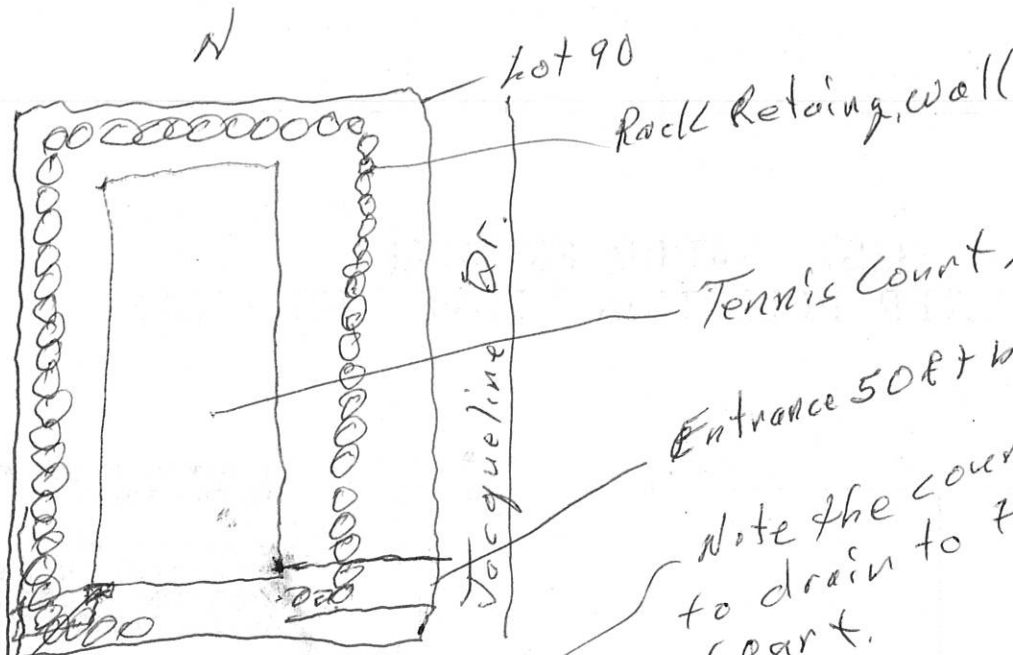

Please explain your request.

I want to remove the tennis court so I can sell the lot as a building lot. A licensed electrician will disconnect the power to the court.

Authorization

By signing below the Owner / Representative authorizes the county to enter the property to perform inspections.

Owner or Authorized Representative Signature <i>A Warren Jaynes</i>	Date <i>6-13-2019</i>
Signature of Approval Tucker Weight	Date 6/19/2019

Tennis Court Approx 8,000 Sq Ft.
 Entrance 50ft by 12ft
 Note the court is constructed to drain to the SW corner of the court.

drain for tennis Court which will be left to control any large storms. The drain has handled all storms for the past 25 years. Once the asphalt on the court is removed the ground will absorb the majority of the water from storms. Note: There is a layer of 3 feet of gravel underneath the court asphalt that was designed to drain water from under the court so that it would not freeze and expand and crack the court. It will absorb a lot of water when the asphalt is gone.

1. Approximately 8600 Sq Ft. 8000 court and entry of 50 feet by 12 feet.
2. Warren Taynes,
3. All work will be done on my property. The electrician will disconnect the power on the lot south of mine (lot 91). The neighbor will be present for that 5 minute task.
4. The fence will be recycled (hailed off by truck). The asphalt will also be recycled. The trees removed will also be hauled off for recycling.
5. No cement will be poured, 6. No porta-jobs are anticipated.
7. Entrance (See drawing) is on the SE corner of the lot.
8. Mud and dirt will be cleaned from the road.
9. The rock wall on the lower side (west side) will direct any excess water to the drain.
10. There are no gutters on Jacqueline Drive - if simply seeps into the ground.
11. See map above.
