COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE

Identify the problem and its location. If appropriate, describe (in general terms) what needs to be completed. However, only if qualified (e.g., you are a designer) should you be mandating specific BMPs to install. Include the date when corrections are made.

There wasn't a SWPPP on site for me to look at so I don't know how up to date it is. I did notice a catch basin that needs to be protected on the site and the road needs to be swept. There isn't a stabilized construction entrance but there was no evidence of tracking either. Please get notification or the living SWPPP document complete with updates and weekly inspections on site for my next inspection.

Inspector, please list all applicable SEV codes:
