**Submittal Checklist**

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 40-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

**Subdivision:** The date that the applicant submits the preliminary subdivision development plat application.  
**Site Plan:** The date that the applicant submits a site plan application or amended site plan.  
**Building Permit:** The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.  
**Land Use Permit:** The date that the applicant submits a land use permit application.  
**Other:** At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

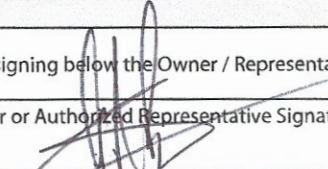

Note: A pre-costruction meeting is required before performing any on-site earth work, unless waived by the county engineer.

**Applicant Narrative**

Please explain your request.  
 We will be building a Single family residence with septic system. disturbed area will be approximately .53 acres

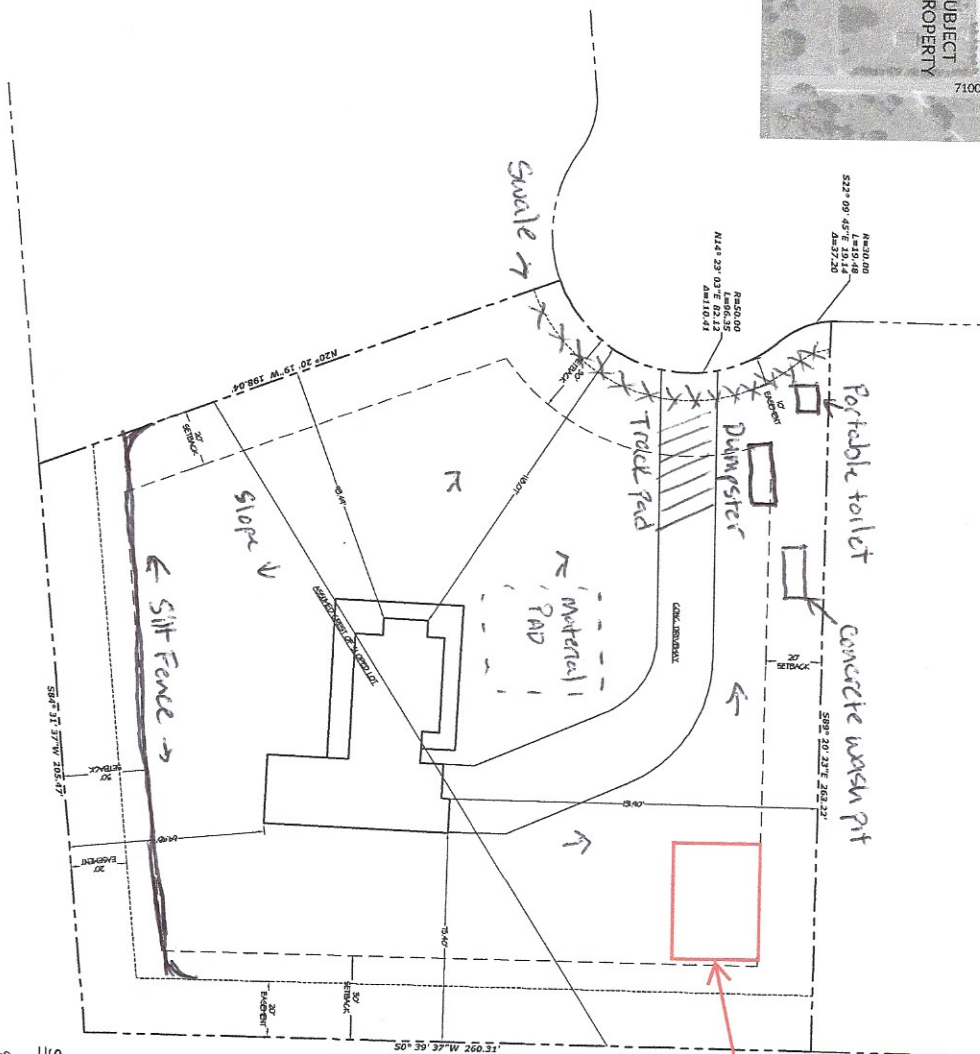

**Authorization**

By signing below the Owner / Representative authorizes the county to enter the property to perform inspections.

## SWPPP

Lot 3 Heritage Knoll Estates

1234 N. 7000 E. Huntsville

Date work starts: 8/18/2019

Completion date: 2/28/2020

Nature of activity: Single family dwelling

Total lot acreage: 1.530

Total disturbed: .53

Controller: Justin Bennett 801-540-6116 email: [justin@outwestbuilders.com](mailto:justin@outwestbuilders.com)

BMP's: Swale, berms and silt fence as shown on site map. There is a swale behind the road to keep sediment from entering roadway. Berms will be placed to keep runoff away from neighboring yards. Silt fence will be used to catch sediment from running down the hill on the South side of lot.

Other controls: construction material pad, dumpster, portable restroom, concrete cleanout and track pad.

Inspections: To be done bi-weekly and within 24 hrs of storm by Justin Bennett controller.

Cleanup: Any runoff or mud tracking will be cleaned up a.s.a.p.

Fueling and maintenance will be done offsite.
