

What will you do to manage the non-storm water discharges? Please list direct discharges, contained non-storm water discharges, and discharges that are treated separately.

- BMP(s):** ☐ All non-storm water discharges are listed as allowable per permit part 1.3 and discharged
☐ All non-storm water discharges that are not allowed are properly contained (see questions 2.12 and 2.16)
☐ All non-storm water discharges that are contaminated with sediment only (free of chemicals, oils, etc.) will be treated in a sediment basin or equivalent (see permit part 2.8.1).
☐ Other: Click here to enter text.

- 2.4** **Is it possible for the total area of disturbance to be phased, minimizing the total exposure of disturbed soil at one time?** (see permit part 2.3.1) Yes ☐ No ☒
If disturbance can be minimized please show the locations on the site map and summarize (here) where disturbances will be delayed for some of the disturbed area: Click here to enter text.

- 2.5** **What perimeter controls will be used to prevent sediment from leaving the site?** (permit part 2.1.2 & 2.3)

- BMP(s):** ☐ Silt Fence ☐ Berms
☐ Vegetative Buffer ☐ Cut-Back-Curb
☒ Staked straw Wattles (Fiber Rolls) ☐ Weighted Wattles
☐ Other: Click here to enter text.

- 2.6** **Are surface waters located within 30 feet of your project's earth disturbances?** Yes ☐ No ☒

Note: A 30' natural vegetative buffer MUST be maintained by water bodies. If a buffer less than 30' is used, you must demonstrate that the additional controls offer the same protection as a 30' natural vegetative buffer, and select the reason for exemption below. (see permit part 2.3.5)

- BMP(s):** ☐ 30' Natural Vegetative Buffer
If less than 30' Natural Vegetative Buffer select additional Controls:
☐ 2 Silt Fence Barrier ☐ 2 Straw Wattle Barriers (Fiber Roll)
☐ Other: Click here to enter text.

- 2.7** **Are there critical or sensitive areas (such as preservation of the drip lines around trees, wetlands, buffer zones by water bodies, etc.) located on or adjacent to the site?** (see permit part 2.2) Yes ☐ No ☒

- BMP(s):** ☐ Separate and Isolate with environmental fencing
☐ Other: Click here to enter text.

- 2.8** **What track out control will be used to prevent dirt from being tracked on streets as vehicles leave the site?** (see permit part 2.4.1)

- BMP(s):** ☐ Track Out Pad ☐ Cobble ☒ Gravel
☐ Rumble Strips ☐ Wash Down Pad ☐ Delivery Pad
☐ Restricted Site Access ☐ Selective Access During Dry Weather (Dry soil)
☐ Other: Click here to enter text.

- 2.9** **Do you have storm drain inlets on or down gradient of this site?** (see permit part 2.1.3) Yes ☒ No ☐

Protection must address the curb inlet opening (throat) as well as the grate.

Where is/are the nearest downstream inlet(s) and how will you protect them: Click here to enter text.

Storm Water Pollution Prevention Plan Template (SWPPP)
Common Plan Permit

- BMP(s):** ☐ Rock/Sand-filled Bags ☐ Drop Inlet Bags
☐ Filter Fabric ☐ Gravel or Sand filled Wattles
☐ Proprietary inlet devices
☒ Other: Silt Fence
- 2.10 Will curb ramps be used at the site?** (see permit part 2.4.2) Yes ☒ No ☐
If curb ramps are used it must be done with material [not dirt] that will not wash away in storm water.
BMP(s): ☒ Crushed Rock ☐ Wood/Steel Ramps
☐ Other: Click here to enter text.
- 2.11 Will there be stockpiles or spoil piles on the site?** Yes ☒ No ☐
Note: Select "Contained by other BMP" if another BMP on your site will contain runoff from the stockpiles. Materials that can be transported with precipitation must not be placed in the street. (see permit part 2.1.1)
BMP(s): ☐ Surrounded by Silt Fence ☐ Surrounded by Staked Straw Wattles
☐ Covered with Tarp ☒ Temporary – Removed same day
☐ Contained by other BMP. Explain: Click here to enter text.
☐ Other: Click here to enter text.
- 2.12 Does the project include installation of concrete, masonry, stucco, and paint (water based) work in this project?** (see permit part 2.4.5 & 2.9.1) Yes ☒ No ☐
Wash water must be contained, the solids dried, and disposed of at a landfill.
BMP(s): ☐ Lined Depression ☐ Steel Dumpster
☒ Regional Washout (per development)
☐ Other: Click here to enter text.
- 2.13 How will solid waste be dealt with on the site?** (see permit part 2.4.3)
Light trash in uncovered dumpsters can blow out and scatter with wind and rain may fall on uncovered leachable material in the dumpster and leak out the bottom causing pollutants to escape.
BMP(s): ☐ Bag Lightweight Trash ☒ Leak Proof Dumpsters
☐ Receptacles with Lids ☐ Other: Click here to enter text.
- 2.14 Will there be a need to dispose of solvents, oil, fuel, etc. liquid waste?** (see permit part 2.9) Yes ☐ No ☒
BMP(s): ☐ Contained and Removed from the site ☐ Collected for Reuse
☐ Other: Click here to enter text.
- 2.15 How will sanitary waste be handled on the site?** (see permit part 2.4.4)
BMP(s): ☒ Portable Toilet(s) (must be staked down on dirt surface & 10' from curb)
☐ Onsite or Adjacent Indoor Bathrooms
☐ Portable Toilet Secondary Containment (secured down with straps to heavy weights)
☐ Other: Click here to enter text.
- 2.16 How will you minimize the discharge of pollutants from spills and leaks?** (see permit part 2.8.3)
BMP(s): ☐ Use of drip pans ☒ Offsite fueling, and maintenance
☐ Spill kit ☐ Spill response plan.
☐ Other: Click here to enter text.
- 2.17 Will there be a need to store construction materials on site?** (see permit 2.8.2) Yes ☒ No ☐
Minimize the exposure of materials with a pollution risk (certain building and landscaping materials,

INSTRUCTIONS

Notice Of Intent (NOI) For Permit Coverage Under the UPDES General Permit For Storm Water Discharges From Construction Activities

Who Must File A Notice Of Intent (NOI) Form State law at UAC R317-8-3.9 prohibits point source discharges of storm water from construction activities to a water body(ies) of the State without a Utah Pollutant Discharge Elimination System (UPDES) permit. The owner and the general contractor of a construction activity that has such a storm water discharge must submit a NOI to obtain coverage under the UPDES Storm Water General Permit. If you have questions about whether you need a permit under the UPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a state agency, contact the storm water coordinator at (801) 536-4300.

Where To File NOI Form The preferred method of submitting an NOI to apply for the construction general storm water permit (CGP) is electronically on-line at <http://www.waterquality.utah.gov/UPDES/stormwatercon.htm>. The fee can be submitted on line also. If on-line is not an option for you send a paper form of the NOI to the following address:

Department of Environmental Quality
Division of Water Quality
P.O. Box 144870
Salt Lake City, UT 84114-4870

Beginning of Coverage CGP coverages are issued immediately after submitting an NOI with the permit fee. The permittee should be aware that though you may not have a permit in hand, if you have submitted a completed NOI with the permit fee you are covered by the conditions in the permit and will be expected to comply with permit conditions. You can print a copy of the CGP from the DWQ web site.

Permit Fees. The permit fee is \$150.00 per year. The fee is paid by Visa/Master Card on-line when an NOI is filed (by check if submitted with a paper NOI). If the project continues for more than one year the fee must be submitted again in a renewal process on-line. CGP coverage will not be issued until the fee is paid.

Length of Coverage: CGP coverage starts the day that the NOI and fee is received at DWQ and expires a year from issuance. All CGP coverages must be renewed within 60-days after the yearly expiration date, or be terminated with a notice of termination (NOT) before the expiration date. To terminate the permit the site must meet the permit conditions for final stabilization (see permit definitions), or must continue under a different permit holder. In most cases the DWQ or municipality of jurisdiction will perform a final inspection when a CGP coverage submits an NOT. If the site passes the final inspection the permit is terminated.

The Storm Water General Permit for Construction Activities UTRC00000 will expire on June 30, 2019 – UTRH00000 expires on September 30, 2020. The Clean Water Act requires that all UPDES permits be renewed every 5 years. If a project extends beyond the expiration date of the Permit it must renew the permit and continue coverage under the renewed permit that will subsequently be developed to continue the same or similar permit coverage for construction activity.

SECTION I - FACILITY OPERATOR INFORMATION Supply the legal name(s) of the person(s), firm(s), public organization(s), or any other entity(ies) that qualifies as the owner of the project (see permit definitions). Do the same for the general contractor that conducts the construction operation at the facility or site to be permitted. The owner and the general contractor of the project may be the same.

Enter the complete address and telephone number of the owner and general contractor and a contact person and number for each. Enter the appropriate letter to indicate the legal status of the operator of the facility.

F = Federal M = Public (other than Fed or State) S = State P = Private

SECTION II - FACILITY/SITE LOCATION INFORMATION Enter the facility name or legal name and project number (if any) of the site and complete street address, including city, state and ZIP code. The latitude and longitude of the facility must be included to the approximate centroid of the site, and the method of how the Lat/Long was obtained (USGS maps, GPS, Internet Map sites [such as Google Earth], or other).

Indicate whether the facility is located in Indian Country. If the facility is located in Indian Country, do not complete this NOI, instead submit an application for coverage under a storm water permit to EPA Region VIII except for facilities on the Navajo Reservation or on the Goshute Reservation which should submit an application to EPA Region IX.

SECTION III - SITE ACTIVITY INFORMATION If the storm water discharges to a municipal separate storm sewer system (MS4), enter the name of

the operator of the MS4 (e.g., the name of the City or County of jurisdiction) and the receiving water of the discharge from the MS4 if it is known (if it is not known look it up at <http://wq.deq.utah.gov>). (An MS4 is defined as a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by a state, city, town, county, district, association or other public body which is designed or used for collecting or conveying storm water).

For Impaired Waters: Go to <http://wq.deq.utah.gov> and identify the water body that will receive the storm water discharge from the permitted site, on the map provided at the web site (zoom in for easier resolution). On the left hand side of the page you will see "2010 Assessment" or "2013 Assessment" depending on the year you refer to the web site (the assessment is done every 3 years). The 20XX Assessment the will indicate if the water is impaired. If there is nothing after 20XX Assessment or the narrative after does not include the word "impaired", your receiving water is not impaired.

For High Quality Waters: On the web page referred to in the paragraph above on the left hand side of the page you will see "Anti-Degradation Category". Under Anti-Degradation Category you will see the category of the water body. Only categories 1 and 2 are high quality water bodies. Some waters may be both categories 1 and 2. If your water body is both category 1 and 3 it means the headwaters of your water body is within Forest Service boundaries, and because it is within Forest Service boundaries it is category 1. If your project is within Forest Service boundaries then your water body is category 1 and it is "high quality". If your project is not within Forest Service boundaries then your water body is category 3 and is not "high quality". Again, category 1 waters are high quality waters, category 3 waters are not high quality waters.

SECTION IV - LISTING LOTS FOR SUBDIVISIONS For the sake of tracking lots that are sold (if a developer chooses to sell lots to another party before the building construction for the lot is completed), and permitted under a different owner (which requires a different permit), developers must list lot numbers.

SECTION V - TYPE OF CONSTRUCTION Check each type of construction that applies to this application.

SECTION VI - BEST MANAGEMENT PRACTICES Check each type of best management practice that will be used to control storm water runoff at the job site.

SECTION VII - GOOD HOUSEKEEPING PRACTICES Check each type of good housekeeping practice that you will use on the site any time during construction activities.

SECTION VIII - ADDITIONAL Provide an estimate of the total number of acres of the site on which soil will be disturbed (to the nearest hundredth of an acre). An email address is required of the best contact associated with the project for the communication needs.

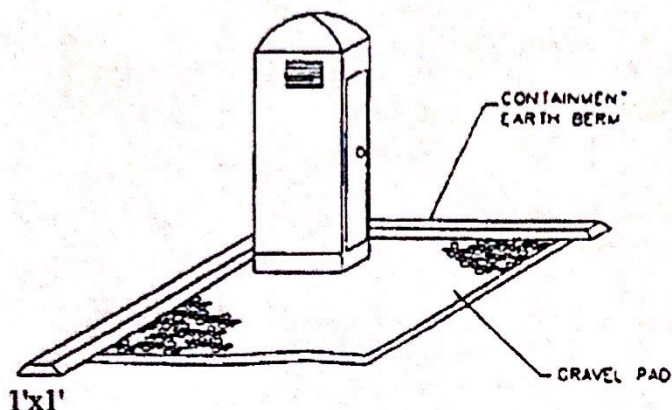

SECTION IX - CERTIFICATION State statutes provide for severe penalties for submitting false information on this application form. State regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, state, Federal, or other public facility: by either a principal executive officer or ranking elected official.

POLLUTION PREVENTION PLAN A storm water pollution prevention plan (SWP3) is required to be in hand before the NOI can be submitted. It is important to know SWPPP requirements (contained in the permit) even during the design portion of the project. A copy of the permit can be obtained from the Division of Water Quality's storm water construction web site. Guidance material for developing a SWPPP can be obtained from the Division of Water Quality's storm water construction web site.

DESCRIPTION:

Temporary on-site sanitary facilities for construction personnel.

APPLICATION:

- ▶ All sites with no permanent sanitary facilities or where permanent facility is too far from activities.

INSTALLATION/APPLICATION CRITERIA:

- ▶ Locate portable toilets in convenient locations throughout the site.
- ▶ Prepare level, gravel surface and provide clear access to the toilets for servicing and for on-site personnel.
- ▶ Construct earth berm perimeter (See Earth Berm Barrier Information Sheet), control for spill/protection leak.

LIMITATIONS:

No limitations.

MAINTENANCE:

- ▶ Portable toilets should be maintained in good working order by licensed service with daily observation for leak detection.
- ▶ Regular waste collection should be arranged with licensed service.
- ▶ All waste should be deposited in sanitary sewer system for treatment with appropriate agency approval.

OBJECTIVES

- ☒ Housekeeping Practices
- ☒ Contain Waste
- ☐ Minimize Disturbed Areas
- ☐ Stabilize Disturbed Areas
- ☐ Protect Slopes/Channels
- ☐ Control Site Perimeter
- ☐ Control Internal Erosion

WEBER COUNTY

ENGINEERING DEPARTMENT

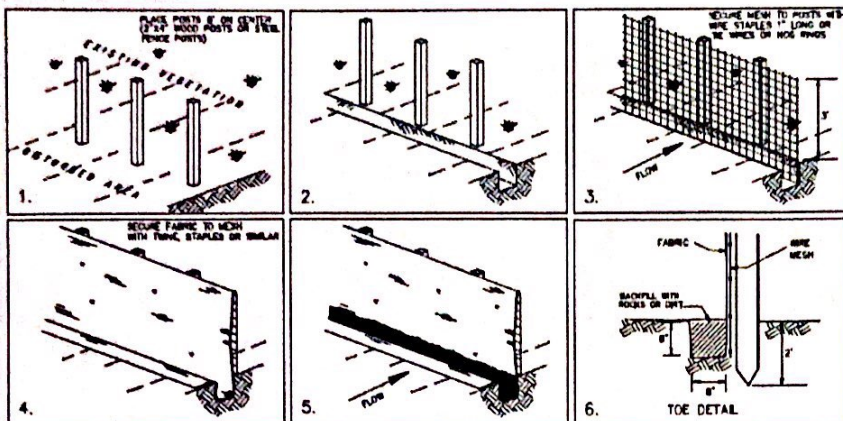

2380 Washington Blvd., Suite 240
Ogden, UT 84401
(801) 399-8374

TARGETED POLLUTANTS

- ☐ Sediment
 - ☐ Nutrients
 - ☐ Toxic Materials
 - ☐ Oil & Grease
 - ☐ Floatable Materials
 - ☒ Other Construction Waste
-
- ☒ High Impact
 - ☒ Medium Impact
 - ☐ Low or Unknown Impact

IMPLEMENTATION REQUIREMENTS

- ☒ Capital Costs
 - ☒ O&M Costs
 - ☒ Maintenance
 - ☐ Training
-
- ☒ High
 - ☒ Medium
 - ☐ Low

**DESCRIPTION:**

- ▶ A temporary sediment barrier consisting of entrenched filter fabric stretched across and secured to supporting posts.

APPLICATION:

- ▶ Perimeter control: place barrier at downgradient limits of disturbance
- ▶ Sediment barrier: place barrier at toe of slope or soil stockpile
- ▶ Protection of existing waterways: place barrier at top of stream bank
- ▶ Inlet protection: place fence surrounding catchbasins

INSTALLATION/APPLICATION CRITERIA:

- ▶ Place posts 6 feet apart on center along contour (or use preassembled unit) and drive 2 feet minimum into ground. Excavate an anchor trench immediately upgradient of posts.
- ▶ Secure wire mesh (14 gage min. With 6 inch openings) to upslope side of posts. Attach with heavy duty 1 inch long wire staples, tie wires or hog rings.
- ▶ Cut fabric to required width, unroll along length of barrier and drape over barrier. Secure fabric to mesh with twine, staples, or similar, with trailing edge extending into anchor trench.
- ▶ Backfill trench over filter fabric to anchor.

LIMITATIONS:

- ▶ Recommended maximum drainage area of 0.5 acre per 100 feet of fence
- ▶ Recommended maximum upgradient slope length of 150 feet
- ▶ Recommended maximum uphill grade of 2:1 (50%)
- ▶ Recommended maximum flow rate of 0.5 cfs
- ▶ Ponding should not be allowed behind fence

MAINTENANCE:

- ▶ Inspect immediately after any rainfall and at least daily during prolonged rainfall.
- ▶ Look for runoff bypassing ends of barriers or undercutting barriers.
- ▶ Repair or replace damaged areas of the barrier and remove accumulated sediment.
- ▶ Reanchor fence as necessary to prevent shortcutting.
- ▶ Remove accumulated sediment when it reaches $\frac{1}{2}$ the height of the fence.

OBJECTIVES

- ☐ Housekeeping Practices
- ☐ Contain Waste
- ☐ Minimize Disturbed Areas
- ☐ Stabilize Disturbed Areas
- ☒ Protect Slopes/Channels
- ☒ Control Site Perimeter
- ☒ Control Internal Erosion

DESCRIPTION:

Prevent or reduce the discharge of pollutants to storm water from concrete waste by conducting washout off-site, performing on-site washout in a designated area, and training employees and subcontractors.

APPLICATIONS:

- ▶ This technique is applicable to all types of sites.

INSTALLATION/APPLICATION CRITERIA:

- ▶ Store dry and wet materials under cover, away from drainage areas.
- ▶ Avoid mixing excess amounts of fresh concrete or cement on-site.
- ▶ Perform washout of concrete trucks off-site or in designated areas only.
- ▶ Do not wash out concrete trucks into storm drains, open ditches, streets, or streams.
- ▶ Do not allow excess concrete to be dumped on-site, except in designated areas.
- ▶ When washing concrete to remove fine particles and expose the aggregate, avoid creating runoff by draining the water within a bermed or level area. (See Earth Berm Barrier information sheet.)
- ▶ Train employees and subcontractors in proper concrete waste management.

LIMITATIONS:

- ▶ Off-site washout of concrete wastes may not always be possible.

MAINTENANCE:

- ▶ Inspect subcontractors to ensure that concrete wastes are being properly managed.
- ▶ If using a temporary pit, dispose hardened concrete on a regular basis.

OBJECTIVES

- ☐ Housekeeping Practices
- ☒ Contain Waste
- ☐ Minimize Disturbed Areas
- ☐ Stabilize Disturbed Areas

APPLICANTS AGREEMENT: The applicant, his successors and assigns, do hereby agree to assume all the duties, obligations, and responsibilities required by the Public Works Standards and any special conditions imposed on them by Weber County Engineering and Roads Departments. The applicant is responsible for maintaining the lateral to the main line.
Applicant agrees to pay monthly sewer service fee assessed by Weber County or other service provider, or which may be established hereafter, by ordinance. Applicant agrees to pay a service connection fee assessed by Weber County or other service provider.
The undersigned further agrees that such service shall be subject to all Ordinances and Laws now in force or which may be established hereafter by ordinance by The State of Utah, Weber County and Central Weber Sewer District. The undersigned further agrees to abide by and to comply with said ordinances, rules and regulations.

I HEREBY AUTHORIZE SERVICE TO BE ESTABLISHED IN MY NAME AT THE ABOVE PROPERTY LOCATION AND AGREE TO PAY FOR SERVICE UNTIL DISCONTINUED BY MY REQUEST IN WRITING. BUT IN CASE NOTICE IS NOT GIVEN OR THE BILLS DUE FOR SERVICE ARE NOT PAID, THEN APPLICANT SHALL CONTINUE TO BE LIABLE FOR BILLING RENDERED THEREAFTER, EVEN THOUGH APPLICANT MAY VACATE THE PROPERTY OR IT MAY BE OCCUPIED BY AOTHER PARTIES WHO FAILED TO MAKE APPLICATION FOR SERVICE AND SIGN A CONTRACT. THE CONTY WILL NOT CONSIDER ANY NOTICES AS BINDING UNLESS MADE IN WRITING. I UNDERSTAND THAT THIS APPLICATION IS ACCEPTED SUBJECT TO MY/OUR AVAILABILITY OF SERVICE AT THIS LOCATION. BY SIGNING BELOW, THE UNDERSIGNED HEREBY CERTIFIES THAT THEY ARE THE LEGAL OWNER OF THE PROPERTY.

IN THE EVENT THAT THE FEE IS 60 DAYS OVERDUE, THE UNPAID AMOUNT WILL BE TURED OVER TO COLLECTIONS OR WERE POSSIBLE YOUR WATER SERVICE MAY RESULT IN DISCONNECTION AND WILL NOT RESUME UNTIL FEES HAVE BEEN PAID. IN THE EVENT THE LAST DAY OF THE MONTH FALLS ON A DAY THE MAIL IS NOT DELIVERED APPLICANT WILL NEED TO BE AWARE OF THAT AND ENSURE THAT IT IS RECEIVED BEFORE THE END OF THE MONTH. BY SIGNING THIS, THE APPLICANT AGREES TO PAY ALL COSTS OF COLLECTION OF THE APPLICANTS UNPAID BILLS. INTREST WILL BE ASSESSED TO ALL OVERDUE ACCOUNTS AT A RATE OF 18%. APPLICANT FURTHER

AGREES THAT ALL CHARGES AS THEY MAY BECOME DUE FROM TIME TO TIME, SHALL BE AND ARE HEREBY MADE A LIEN UPON THE ABOVE PROPERTY, TOGETHER WITH COSTS OF COLLECTION, INCLUDING COURT COSTS AND A REASONABLE ATTORNEY'S FEE, SO LONG AS SUCH CHARGES REMAIN UNPAID, AS BETWEEN THE PARTIES TO THIS CONTRACT. BILLINGS ARE DUE ON THE LAST DAY OF THE MONTH.
