Applicable Codes

- Weber County Land Use Code Title 102 (Administration) Chapter 3 (Board of Adjustment)
- Weber County Land Use Code Title 104 (Zones) Chapter 13 (Forest Residential FR-1 Zone)
- Weber County Land Use Code Title 108 (Standards) Chapter 12 (Noncomplying Structures, Nonconforming Uses, And Nonconforming Lots) Section 13 (Setback Requirements For Nonconforming Lots)

Background

The applicant has submitted variance requests for side and rear yard setbacks for a proposed nonconforming and irregularly shaped lot in the FR-1 Zone. The first request is for an 11-foot variance from the side yard setback of 20-feet to allow for a 9-foot side setback. The second request is a 19-foot variance from the rear yard setback of 30-feet to allow for an 11-foot rear setback. Both of these variances are requested to facilitate a reasonable single-family dwelling footprint on an amended Lot 6 of the Hermitage Block 10 subdivision (depicted as Lot 3 on the proposed subdivision amendment).

As indicated above, and in tandem with these variance requests, the applicant has also submitted a subdivision amendment application to reconfigure Lots 3, 4, 5, and 6 of the existing Hermitage Block 10 subdivision. The overall intent of these applications is to “allow for adequate spacing for the proposed single-family dwellings [301, 303, and 305], septic systems, and to give enough depth for the driveway to come off of Highway 39.” (See **Exhibit A**, Variance Application). This will be done by eliminating Lot 5 of the existing subdivision and using its area and frontage to increase the remaining 3 lots’ overall width and area. By doing so, these amendments will allow the remaining lots to be less nonconforming with current zoning standards and improve the overall spacing and configuration of the developable areas (see **Exhibit B** for the proposed subdivision plat).

Per LUC 101-1-7, Lot 3 of the proposed amended subdivision meets the definition of both a Nonconforming and Irregular Shaped Lot:

Lot, nonconforming. The term "nonconforming lot" means a lot or parcel that complied with lot standards in effect at the time of the lot's creation and, because of subsequent changes to the Land Use Code, does not conform to the current lot

standards. Applicable standards include lot standards of the zone in which the lot is located, lot standards of the subdivision ordinance, and other lot standards of this Land Use Code.

Lot, irregular shaped. The term "irregular shaped lot" means any building lot whose boundaries are:

1. Comprised of three or more than four lot lines;
2. A lot in which the side lot lines are not radial or perpendicular to the front lot line; or
3. In which the rear lot line is not parallel to the front lot line.

Where an irregular shaped lot occurs, the interior angle of intercepting lot lines with an angle of 135 degrees or greater shall be considered the same lot line and yard designation. If the angle is less than 135 degrees, the yard designation shall be determined to be different and the applicable yard requirements would apply.

Due to its nonconforming status and irregular shape, this lot is allowed a standard reduction in side yard setback requirements from the FR-1 zoning minimum of 20 feet. This reduction is calculated per the requirements of LUC 108-12-13 as follows:

Sec 108-12-13 Setback Requirements For Nonconforming Lots

A nonconforming lot that has a smaller width than is required for the zone in which it is located may be developed in a manner that does not exceed the following allowed reduction in side yard setbacks:

- (a) A nonconforming lot's actual width (v) may be divided by the current required frontage/width (w) in order to formulate a ratio or proportional relation (x). (Formula: "v" divided by "w" equals "x".)
- (b) The ratio may then be multiplied by the current zone's side yard setback requirement (y) in order to establish a reduced setback (z). (Formula: "x" multiplied by "y" equals "z".)
- (c) The reduced side yard setback is subject to the conditions listed below.
 - (1) Under no circumstances shall an interior lot be allowed to reduce the side-yard setback requirement below five feet on one side and eight feet on the other.
 - (2) Under no circumstances shall a corner lot be allowed to reduce the side-yard requirement below ten feet when the side yard fronts on a street.

The calculation results for the standard side yard setbacks on Lot 3 of the proposed amended subdivision are as follows:

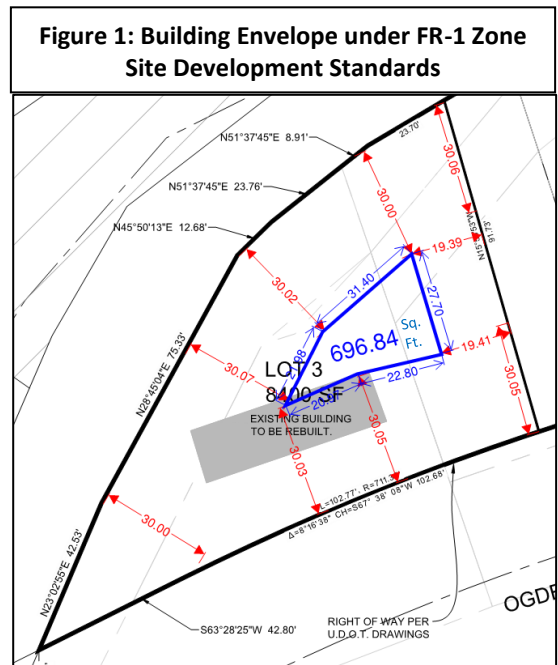

145.47' Actual Width
 145.47' / 150' (FR-1 zone minimum width) = 0.97 (Reduced side yard setback ratio)
 0.97 x 20' (FR-1 zone side yard setback minimum) = **19.4'** (reduced side yard setback)

The results of this ratio calculation indicate that the standard side-yard setback for Lot 3 would only be reduced by **0.6 feet**. This is primarily due to the large width of Lot 3. Whereas a nonconforming lot with a smaller width (such as the other two lots in the proposed subdivision) enjoy a much larger setback reduction due to a larger ratio between the actual lot width, and required lot width. For example, Lot 2 of the proposed subdivision is allowed a reduced side yard setback of 8.02 feet.

In summary, the standard side-yard reduction for nonconforming lots, in conjunction with the required rear and front yard setbacks in the FR-1 zone, is not enough to accommodate a reasonable building envelope on Lot 3 of the proposed amended subdivision. See **Figure 1** for the allowed building footprint (696.84 sq. ft.) under the current FR-1 site development standards and standard reduced side-yard setbacks:

The applicant's application narrative argues:

"Even with the increased space from eliminating one lot, the shape and depth created by the sharp angle [west side/rear property line junction] provide an unreasonable shape and space in which to fit the footprint of a home... granting the variances would allow the new dwelling to have the same setback that it already has [see existing structures] on its west side and will be similar or even better than others nearby."

Summary of Board of Adjustment Considerations

LUC §102-3 states that one of the duties and powers of the Board of Adjustment is to hear and decide variances from the requirements of the Weber County Land Use Code. In order for a variance to be granted it must be shown that all of the following criteria have been met:

- a. *Literal enforcement of the ordinance would cause an unreasonable hardship for the applicant that is not necessary to carry out the general purpose of the Land Use Code.*
 1. *In determining whether or not literal enforcement of the land use code would cause unreasonable hardship, the appeal authority may not find an unreasonable hardship unless the alleged hardship is located on or associated with the property for which the variance is sought, and comes from circumstances peculiar to the property, not from conditions that are general to the neighborhood.*
 2. *In determining whether or not literal enforcement of the land use code would cause unreasonable hardship, the appeal authority may not find an unreasonable hardship if the hardship is self-imposed or economic.*
- b. *There are special circumstances attached to the property that do not generally apply to other properties in the same zone.*
 1. *In determining whether or not there are special circumstances attached to the property, the appeal authority may find that special circumstances exist only if the special circumstances relate to the hardship complained of, and deprive the property of privileges granted to other properties in the same zone.*
- c. *Granting the variance is essential to the enjoyment of a substantial property right possessed by other property in the same zone.*
- d. *The variance will not substantially affect the general plan and will not be contrary to the public interest.*
- e. *The spirit of the land use ordinance is observed and substantial justice done.*

Staff's analysis and findings are discussed below:

- a. Literal enforcement of the Land Use Code would require an undesirable result. Literal enforcement of the 30-foot front yard setback and the 19.4-foot reduced side yard setback would require a building footprint that would be inefficient and would produce a structure that does not match neighboring development.
- b. The special circumstances that apply in this instance are due to the unique wide and shallow shape of the parcel, that when standard zoning setbacks are applied, would create a hardship on the owner by preventing the placement a reasonable dwelling footprint on the property.
- c. Granting the variance would allow the owner of the parcel to improve the overall subdivision proportions and building separation while also improving the nonconformance of the existing lots to better match current zoning dimensions.
- d. The General Plan indicates that this area should be developed as is planned and zoned; thereby the variance and development is not contrary to any public interest.
- e. This variance request is not an attempt to avoid or circumvent the requirements of the County Land Use Code. The applicant has gone through the proper channels in applying for a variance. Granting this variance will improve the area through the reduction of one lot, additional lot and building separation, and consistent building setbacks.

Conformance to the General Plan

Preservation of open spaces and the development of single-family residences are supported by the Ogden Valley General Plan. The same are proposed through these variance requests and associated subdivision amendment.

Staff Recommendation

Staff recommends approval of an 11-foot variance from the side yard setback and a 19-foot variance from the rear yard setback in the FR-1 zone. This recommendation is conditioned upon the approval of an associated subdivision amendment to the Hermitage Block 10 subdivision.

Applicant Narrative

Please explain your request.

I am requesting a side yard variance on parcel 6 of the proposed Neilson Hermitage subdivision. I propose the East side yard set back be ~~9~~ 9 feet in addition to the North West side/rear setback to 11 feet. This will allow for adequate spacing for the proposed single family dwellings, Septic systems, and to give enough depth for the driveway to come off of Highway 39.

Variance Request

The Board of Adjustment may grant a variance only if the following five criteria are met. Please explain how this variance request meets the following five criteria:

1. Literal enforcement of the ordinance would cause an unreasonable hardship for the applicant that is not necessary to carry out the general purpose of the Zoning Ordinance.
 - a. In determining whether or not enforcement of the land use ordinance would cause unreasonable hardship, the appeal authority may not find an unreasonable hardship unless the alleged hardship is located on or associated with the property for which the variance is sought, and comes from circumstances peculiar to the property, not from conditions that are general to the neighborhood.
 - b. In determining whether or not enforcement of the land use ordinance would cause unreasonable hardship, the appeal authority may not find an unreasonable hardship if the hardship is self-imposed or economic.

Due to the sharp angle of the west corner of parcel 6, the shape of the lot is the main hardship. The wide frontage does not permit a substantial allowed reduction, given for the FR1 Zone. The rear setback is also a burden because of the unique shape. We propose to maintain the existing structures rear-side setback of 11 feet.

Variance Request (continued...)

2. There are special circumstances attached to the property that do not generally apply to the other properties in the same zone.

a. In determining whether there are special circumstances attached to the property, the appeal authority may find that special circumstances exist only if the special circumstances relate to the hardship complained of, and deprive the property of privileges granted to other properties in the same zone.

Please describe the special circumstances attached to the property that do not generally apply to the other properties in the same zone:

Even with the increased space from eliminating one lot, the shape and depth created by the sharp angle provide an unreasonable shape and space in which to fit the footprint of a home.

3. Granting the variance is essential to the enjoyment of a substantial property right possessed by other property in the same zone.

The square footage of this property is larger than its neighbors. Granting the variance would allow the new dwelling to have the same setback that it already has on its west side and will be similar or even better than others nearby.

Variance Request (continued...)

4. The variance will not substantially affect the general plan and will not be contrary to the public interest.

For 30 plus years the neighborhood has dealt with these properties that attract vandalism, are eyesores to the area and are hazardous in general. This variance would allow us to make sense of the property by spacing 301, 303 and 305 aesthetically, while utilizing the square footage rationally.

5. The spirit of the land use ordinance is observed and substantial justice done.

Similar to my answer in #4 - receiving this variance would allow me to develop the property, beautify the area, increase surrounding property values and make this home functional and practical by doing what other homes in this area have already done - All without going to unreasonable lengths to accomplish it.
