RE: Kevin Murray Property, 1 Lot  
1639 S. 7500 W., West Warren  
Parcel#

Gentlemen:

The plans and supporting information for the above-referenced subdivision have been reviewed.

Culinary water will be provided by the West Warren-Warren Water District, an extension of an existing approved community water system. **A letter from the water supplier is required.**

Soil characteristics, percolation rates of 53 MPI, and anticipated ground water tables not to exceed 24 inches, fall within the range of acceptability for the installation of an At-Grade Wastewater Disposal System. Maximum trench depth is limited to 0 inches. The system is to be installed in the location of the exploration pit.

Plans for the construction of any wastewater disposal system is to be prepared by a Utah State Certified individual and submitted to this office for review prior to issuance of a wastewater disposal permit.

All subdivision plats submitted for review are to show the location of exploration pits and percolation tests. Key number or letter designation will be provided by this office along with logs of soil horizons and final percolation rates. Mylars submitted for signature without this information will be returned.

Each on-site individual wastewater disposal system must be installed in accordance with Onsite Wastewater Systems Rule, R317-4, Utah Administrative Code, Individual Wastewater Disposal Systems and Weber-Morgan Health Department policies. Final approval will be given only after an on-site inspection of the completed project and prior to the accomplishment of any backfilling. Please be advised that the conditions of this letter are valid for a period of 18 months. At that time the site will be re-evaluated in relation to rules in effect at that time.

Sincerely,

Summer Day, LEHS  
Environmental Health Division
