## Submittal Checklist

☒ The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

**Subdivision:** The date that the applicant submits the preliminary subdivision development plat application.

**Site Plan:** The date that the applicant submits a site plan application or amended site plan.

**Building Permit:** The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.

**Land Use Permit:** The date that the applicant submits a land use permit application.

**Other:** At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-construction meeting is required before performing any on-site earth work, unless waived by the county engineer.

## Applicant Narrative

Please explain your request.

garage addition and driveway relocation

## Authorization

By signing below the Owner / Representative authorizes the county to enter the property to perform inspections.

|                                                            |                 |

## Stormwater Pollution Prevention Plan

### Grangetto Residence

1. Disturbed soil equal approximately 3,700 sq-ft for the driveway re-contouring and approximately 1,300 sq-ft for the home addition.
2. The excavation sub-contractor and general contractor will be responsible for the conditions of the site during construction. *MIKE SPREIO 861-430-4803*
3. Environmental fencing will be used to protect neighbors from being affected by the proposed construction activities.
4. The excavated material will be temporarily stock-piled and re-used or removed from the site.
5. The concrete washout will be inside of the new building addition envelope.
6. Porta-johns will be located within 300-feet of the new addition and will be temporary in nature.
7. Existing driveway approach will be used for the construction entrance with the new drive approach using the existing entrance from the roadway.
8. Contractor will perform all clean-off responsibilities within the site parameters and will broom sweep debris from roadway as required.
9. Drainage ditch or swall on the property will be protected with environmental protection fencing.
10. Rain/storm water drains to an existing drainage feature leading to the roadside ditch perpendicular to the property.
11. See attached plan for existing residence (occupation) on the property.
