Dear Applicant(s): RE: Exchange Application: E4512 (35-11717)

Enclosed is the Certificate of Beneficial Use issued by the State Engineer as the final step in completing the appropriation relating to the above-numbered water right. If you do not agree with any item of the water right awarded to you by the Certificate, you have rights of recourse as listed in the following paragraph.

If proof of EXCHANGE of water was submitted on or after January 1, 1988, this Certificate is subject to the provisions of Rule R655-6-17 (formerly Rule R625-6-17) of the Division of Water Rights and to Sections 63-46b-13 and 73-3-14 of the Utah Code Annotated, 1953, which provide for the filing of either a Request for Reconsideration with the State Engineer or an appeal with the appropriate District Court. A Request for Reconsideration must be filed with the State Engineer within 20 days of the date of this letter. However, a Request for Reconsideration is not a prerequisite to filing a court appeal. A court appeal must be filed within 30 days after the date of this letter or if a Request for Reconsideration has been filed, within 30 days after the Request for Reconsideration is denied. A Request for Reconsideration is considered denied when no action is taken 20 days after the Request is filed.

Under the law, you have the right to record this Certificate in the office of the County Recorder in the county where the water is diverted. If you decide to record this Certificate, you should attend to this matter at once.

If you have questions or if we can assist you, we will be happy to do so. Your contact with this office, should you need it, is with the Weber River Regional Office. The telephone number is 801-538-7240.

Sincerely,

Kent L. Jones, P.E.
State Engineer

HEARING SUBMITTAL TO
DIVISION OF WATER RIGHTS
Right No.: 25-12966 (6547)
Date: 21 APRIL 2012
Submittee: PROTESTANT
ROGERS

1/3

IRRIGATION: from Apr 1 to Oct 31. SOLE SUPPLY: 0.3333 acres

PLACE OF USE: (which includes all or part of the following legal subdivisions:)

		Northwest Quarter				Northeast Quarter				Southwest Quarter				Southeast Quarter				Section	
BS TOWN	RANG	SC	NW	NE	SW	SE	NW	NE	SW	SE	NW	NE	SW	SE	NW	NE	SW	SE	Totals
SL	6N	3W	12			*				*			0.3333		*				0.3333
																		Group Total:	0.3333

LIMITATION(S): -- Exchange E4512 is limited to:
 the irrigation requirements of 0.3333 acre,
 an annual diversion for irrigation of 1.0000 acre-foot.

4. EXPLANATORY:

This exchange certificate is based on a contract with Weber Basin Water Conservancy District. The owner of this exchange must maintain a valid contract to prevent this exchange from lapsing.

5. SIGNATURE OF STATE ENGINEER & ACKNOWLEDGMENT OF NOTARY PUBLIC:

The right evidenced by this certificate is restricted to the exchange described herein, and the certificate in no way establishes nor validates the water right claimed by the applicant, and the exchange is to in no way enlarge the original right or rights. This certificate entitles the holder to use only sufficient water from all rights combined to constitute an economic duty without waste of water. The works used in this exchange are to be operated and maintained in such a manner and condition as will prevent waste of water.

In Witness Whereof, I have hereunto set my hand and affixed the seal of my office this

14th day of May, 20 12.

SEE EXPLANATORY**

STATE OF UTAH

EXCHANGE No: E4512 (35 - 11717)

WHEREAS, it has been made to appear to the satisfaction of the State Engineer that an exchange of water has been accomplished under the above-numbered exchange application in accordance with the Laws of Utah; THEREFORE, be it known that the State Engineer hereby certifies that the owner of the exchange represented by this certificate has the right to the use of the water in the quantity, for the purpose, at the place, and during the time specified herein, subject to prior rights, if any, and subject to the maintenance of the underlying contract or supporting water right(s).

=====

ATTENTION: In the event that ownership of the exchange evidenced by this certificate is transferred, it is the responsibility of the new owner to update the State Engineer's records by submittal of an appropriate report of conveyance.

 Description _____

11. PLACE OF USE (By competent survey. Since water rights can be appurtenant to the place of use, be specific and exact in describing the location of each use for the water right owner. Written descriptions and any maps should coincide. The legal description of the property where the water is used should accompany the proof (land deed, tax notice, county plat, etc). Maps must show the configuration of the place of use and the acreage of irrigated land.

Lot 1 within Barrow Subdivision, Southwest Quarter of Section 12, Township 6 North, Range 3 West, SLB&M
 West Warren, Weber County, Utah (see attached plat map)

MAPS AND DRAWINGS (Must comply with rules and standards established by the State Engineer.)
 These documents shall be based on competent land surveys, signed and stamped by the licensed engineer/surveyor, and submitted on standard drafting medium that is durable and reproducible with all information legible and in black permanent drafting ink or other media of equivalent durability. Standard mapping conventions must be used (north arrow, scale in both written and graphic form, legend describing any symbols, etc.). Lines must be distinct. Shading or hatching may show irrigated acreage, but the boundary of the irrigated area must be delineated. All property surveys must tie to the section-township-range survey for the area of use, and basis of bearing for the bearings must be shown. Any public roads or other access information near the surveyed property should be shown. The most convenient map sizes are 8 1/2" x 11" or 8 1/2" x 14", particularly for irrigated acreages of 5 acres or less. Maps of small parcels should be drawn to the largest scale practical and at the least 1"=300'. There must be at least 1 1/4" margin at the top and 1/2" margin on the sides and bottom. The title block should appear on the lower right-hand side of the page (the short side being the bottom). If a larger map is needed, the dimensions should be 24" x 36" with the title block in the lower right-hand corner (the long side being the bottom). The title block must include the water right number, application number, survey date, the applicant's name, proof professional's name and license number, and the section, township, and range of the described parcel(s). Maps must not be folded.

RECEIVED
JAN 31 2012
WATER RIGHT
SALT LAKE

Proof for Water Right Number 35-11717 Application Number E4512

- 12. **WATER MEASUREMENT** (Provide sufficient details to enable the State Engineer to compute the quantity of water measured in each case, including current meter notes, rating table, field observation notes, etc. Measurements must be made by engineer/surveyor or his/her authorized representative and may be made by vessel, weir, meter, rated flume, reservoir capacity table or other standard method. Where the source of supply is of fluctuating nature, a series of measurements should be submitted to show the variation and period(s) during which flow is available. The maximum diverted flow and/or acre-footage cannot exceed that approved in the application. If larger amounts are measured, control devices should be described.

Date(s) Water Measured January 7, 2012 - Measured 6.1 gpm

Name of Measurement Taker Matthew Murdock, PLS

Method of Measurement Timed discharge to 5 gallon bucket. Measured 49 seconds to fill 5 gallon bucket.

Flow was measured at a pipe discharging near the wellhead. Discharge was allowed to stabilize prior to measurement.

- 13. **EXPLANATORY** (Additional space for above items and to define use of water such as crop rotation plans, facility plans and capacities, operation schedules, lot numbers, mining claim numbers, sewage systems, etc. Use additional 8 1/2" x 11" pages if needed.)

CAUTION: File proof only if all desired development is done and the water is being fully put to beneficial use. Otherwise, consider requesting an Extension of Time. The water right will be limited to the extent and nature of use in the accepted proof.

CERTIFICATE OF APPLICANT(S) (MUST be complete before filing with the State Engineer.)

STATE OF Utah COUNTY OF Weber

Having been duly sworn, I hereby certify that Wasatch Civil Consulting Engineering was employed to prepare Proof of Beneficial Use for Water Right No. 35-11717 Application No. E4512, and that to the best of my knowledge all information in the proof and all accompanying documents is accurate and complete and is free of fraud, misrepresentation, and omission of material fact.

I have attached my Proof of Beneficial Use of our existing well. My original documentation is being sent to you through FEDEX. I received an email from Fedex this morning stating that they couldn't find your office. I have contacted them and informed them that the address for the Division of Water Right's is correct. I will make sure you receive the original documentation. I hope this will not cause any lapse in our contract with you. Please call me if you have any questions or concerns.

Thank you,

Misty Rogers

 Description _____

11. PLACE OF USE (By competent survey. Since water rights can be appurtenant to the place of use, be specific and exact in describing the location of each use for the water right owner. Written descriptions and any maps should coincide. The legal description of the property where the water is used should accompany the proof (land deed, tax notice, county plat, etc). Maps must show the configuration of the place of use and the acreage of irrigated land.)

Lot 1 within Barrow Subdivision, Southwest Quarter of Section 12, Township 6 North, Range 3 West, SLB&M
West Warren, Weber County, Utah (see attached plat map)

MAPS AND DRAWINGS (Must comply with rules and standards established by the State Engineer.)
 These documents shall be based on competent land surveys, signed and stamped by the licensed engineer/surveyor, and submitted on standard drafting medium that is durable and reproducible with all information legible and in black permanent drafting ink or other media of equivalent durability. Standard mapping conventions must be used (north arrow, scale in both written and graphic form, legend describing any symbols, etc.). Lines must be distinct. Shading or hatching may show irrigated acreage, but the boundary of the irrigated area must be delineated. All property surveys must tie to the section-township-range survey for the area of use, and basis of bearing for the bearings must be shown. Any public roads or other access information near the surveyed property should be shown. The most convenient map sizes are 8 1/2" x 11" or 8 1/2" x 14", particularly for irrigated acreages of 5 acres or less. Maps of small parcels should be drawn to the largest scale practical and at the least 1"=300'. There must be at least 1/4" margin at the top and 1/2" margin on the sides and bottom. The title block should appear on the lower right-hand side of the page (the short side being the bottom). If a larger map is needed, the dimensions should be 24" x 36" with the title block in the lower right-hand corner (the long side being the bottom). The title block must include the water right number, application number, survey date, the applicant's name, proof professional's name and license number, and the section, township, and range of the described parcel(s). Maps must not be folded.

Proof for Water Right Number 35-11717

Application Number E4512

12. **WATER MEASUREMENT** (Provide sufficient details to enable the State Engineer to compute the quantity of water measured in each case, including current meter notes, rating table, field observation notes, etc. Measurements must be made by engineer/surveyor or his/her authorized representative and may be made by vessel, weir, meter, rated flume, reservoir capacity table or other standard method. Where the source of supply is of fluctuating nature, a series of measurements should be submitted to show the variation and period(s) during which flow is available. The maximum diverted flow and/or acre-footage cannot exceed that approved in the application. If larger amounts are measured, control devices should be described.

Date(s) Water Measured January 7, 2012 - Measured 6.1 gpm

Name of Measurement Taker Matthew Murdock, PLS

Method of Measurement Timed discharge to 5 gallon bucket. Measured 49 seconds to fill 5 gallon bucket.

Flow was measured at a pipe discharging near the wellhead. Discharge was allowed to stabilize prior to measurement.

13. **EXPLANATORY** (Additional space for above items and to define use of water such as crop rotation plans, facility plans and capacities, operation schedules, lot numbers, mining claim numbers, sewage systems, etc. Use additional 8 1/2" x 11" pages if needed.)

CAUTION: File proof only if all desired development is done and the water is being fully put to beneficial use. Otherwise, consider requesting an Extension of Time. The water right will be limited to the extent and nature of use in the accepted proof.

State Engineer/Division Director

ORDER OF THE STATE ENGINEER JAN 29 2007
For Exchange Application 35-11717 (E4512)

Exchange Application 35-11717 (E4512) in the names of Ryan Brent and Misty Rogers was filed on December 29, 2004, to exchange 1.00 acre-foot of water as evidenced by Water Right Numbers 35-7397 (A10989) and 35-827 (A27608) owned by the U.S. Bureau of Reclamation and a contract (Number 64100) for its use with Weber Basin Water Conservancy District. The 1.00 acre-foot of water is to be released from Pineview Reservoir and, in lieu thereof, 1.00 acre-foot of water will be diverted from: (1) Well - South 190 feet and East 1950 feet from the W¼ Corner of Section 12, T6N, R3W, SLB&M (existing 2-inch, 503 feet deep). The water is to be used for irrigation of 0.33 acre from April 1 to October 31. The water is to be used in all or portion(s) of Section 12, T6N, R3W, SLB&M.

Notice of the application was published in the Standard Examiner on January 13 and 20, 2005. No protests were received. It appears that this exchange can be made provided certain precautions are observed.

It is, therefore, **ORDERED** and Exchange Application Number 35-11717 (E4512) is hereby **APPROVED** subject to prior rights and the following conditions:

- 1) The basis for this exchange right is a contract between the applicants and Weber Basin Water Conservancy District. This contract must be maintained for this exchange to remain valid. No water may be withdrawn under this application if a contract is not in effect.
- 2) Total diversion under this exchange application is limited to 1.00 acre-foot of water per year for irrigation of 0.33 acres from April 1 to October 31. Section 73-5-4 of the Utah Code provides that "every person using water in this state shall construct or install and maintain...controlling works...and measuring device at each point where water is diverted or turned out, for the purpose of regulating and measuring the quantity of water that may be used..." In the event that the State Engineer or an authorized representative is required to administer and/or distribute your water right, you will be notified in writing. At that time, if you have not already installed an adequate measuring device, you will be required to do so by a specific deadline. Instruction will also be given concerning any monitoring of your water diversion. Failure to comply could result in an order to cease the use of water and/or the revocation of this approval.
- 3) The water being exchanged shall be released from Pineview Reservoir into the Ogden River as called for by the river commissioner.
