This should be a "turnout" area which is a wider area of road with an area 20' wide by 40' in length.

This will need to be a turn around such as a cul-de-sac, hammerhead, T or a Y. Examples are attached to this review.
- 1200 feet

Existing Bridge:
The existing bridge will have to be evaluated by an engineering firm to determine the weight limits. See written comments.
