

Signage Plan

Nordic Valley - Yurts Project
Permit Number: CUP2020-03

The addition of two (2) 30ft. yurts behind the first Rental yurts will not require any new outdoor signage.. The purpose of the additional two yurts is to add shelter and expand the existing ski and snowboard rental services entirely indoors. See below the signage currently in use approaching the entry point of the Rental operations (see image A below). The additional two yurts are planned to be built behind the first one. No outdoor signage necessary as the customers will be entering the rental operations using the same entrance
