

Thistle Seed Farm 2020 - 2022.

1.) November 2020. The land at time of purchase.

2.) October 2021. Debris removed and field prepared for first tilling.

3.) October 2021. Freshly tilled field.

4.) October 2021. First compost delivery.

5.) November 2021. Removing rocks from the tilled field.

6.) November 2021. Spreading the compost.

7.) May 2022. Cover crops planted and stakes for dahlia netting installed.

- 8.) June 2022. Seedlings emerging. Weeds are categorized as beneficial for root shading and deer repellent vs. those that must be removed. The area in the foreground will be for shade plants. Trees were planted around this area to the SW to heavily shade these plants and provide partial shade to parts of the field.

9.) July 2022. Flowers - larkspur, snapdragons, etc.

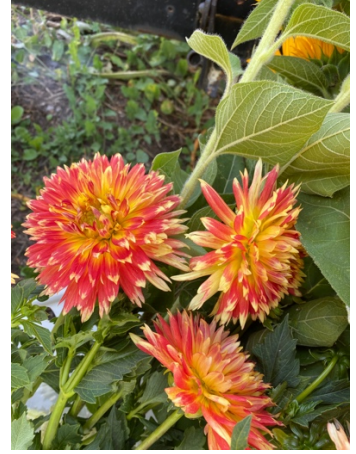

Sunflowers

Dahilas

Hellebore (shade plants)
