Co-Permittee

Any party performing construction activity at the facility or site described in the application. The name of the operator may be the developer, owner, general contractor, design firm, the excavation contractor and/or others.

Card Verification Value

The card security code (CSC) is a 3- or 4- digit number which is not part of the credit card number. The number appears only on the credit card itself (not on

receipts or statements), so provides some assurance that the physical card is in the possession of the buyer. This reduces the chance of fraudulent card use.

For Visa, MasterCard, and Discover Card, the code is the last 3 digits of the number printed on the back of the credit card in the signature field. For American Express, it is the 4 digit number printed on the right side above the imprinted card number on the front of the credit card.
