PO Box 13567
Ogden UT 84412

RE: Property Located at:
Located East of 10450 W Hwy 39, Huntsville UT
Parcel #21-018-0028

A record search for all documentation associated with the onsite wastewater treatment systems (OWTS) servicing the Ogden Eagles Campsite was performed by our office. The results are as follows. Three OWTS were originally associated with this campground. One of these systems permit #W65085 is believed to now be associated with parcel #21-013-0002. This parcel was separated from the Eagles Campsite after the time of original installation. The two parcels no longer have the same parcel number or ownership. The two OWTS currently servicing the campsite are permit #W77-078 permitted in 1977 and permit #W76108 permitted in 1976. Both systems were installed and given final approval by our office in April 1977.

Currently our office views the OWTS as functioning as designed. Our office has not received any report(s) or complaint(s) indicating that the OWTS is not functioning. Please be advised that all absorption field have a life span. Our office is a tool to utilize at the time of drainfield failure. If you have any further questions, you may contact this office at (801)399-7160.

Sincerely,

Summer Day, LEHS, Program Manager
