K	380000000000000000000000000000000000000
All series do if she map, new BMP details & specs in SWPPP, SWPPP amentment Log. etc.)?  Are on-site inspections being performed and recorded by a qualified person on a weekly obasis, reporting items required by permit? (Inspector me &qualifications, weather, problems/repairs, corrective action, new BMPs, emoved BMPs, discharges, etc.)  Have all corrective aution in previous inspections been addressed and documented within the time farme allotted by the inspector?  Are SWI flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silt fence, gradient boundary sediment control, etc.).  Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations?  Is there avidence of vehicles tracking soil of the construction site?  Is there avidence of vehicles tracking soil of the construction site?  Is there avidence of vehicles tracking soil of the construction site?  Is there avidence of vehicles tracking soil of the construction site?  Is there avidence of vehicles tracking soil of the construction site?  Is there avidence of vehicles tracking soil of the construction site?  Is there avidence of vehicles tracking soil of the construction site?  Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets multih, vegetated strips, rip rap, surface (gleining, pipe slope drain, dust control etc.)?  Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets multih, vegetated strips, rip rap, surface substances to recompany the construction materials management, and the control port-o-pottes staked down, fueling areas, concrete wash out area, proper cuts transps, spill prevention, etc.?  Are there distributed areas that have on that do construction activities for 14 to 21 days without stabilization? (except shows or frozen ground)?  Are there places where BMPs are needed and should be ins				_	
Are on-site inspectors being performed and recorded by a qualified person on a weekly of bioweakly basis, reporting items required by permit? (Inspector we action terms from previous inspections been addressed and documented within the time frame allotted by the inspector?  Name all corrective action terms from previous inspections been addressed and documented within the time frame allotted by the inspector?  Name all corrective action terms from previous inspections been addressed and documented within the time frame allotted by the inspector?  Name SW flows retening and leaving the construction time controlled managed or diverted around the ste? (e.g. perimeter controls, berms, slit fence, gradient boundary diversion, down gradient boundary sediment control, etc.) is there evidence of vehicles tracking soil of the construction site?  Is there evidence of vehicles tracking soil of the construction site?  Is there evidence of vehicles tracking soil of the construction site?  Is there evidence of vehicles tracking soil of the construction set?  Is there evidence of vehicles tracking soil of the construction set?  Is there a need to repair, mantain, or improve erosino control BMPs (temporary stabilization, erosino blankets, mulch, vegetated strips, np rap, surface in general need to repair, mantain, or improve sediment control BMPs (sit fence, check dams, fiber rolls, sediment trapbash, inlet protection, waddles, whals, or the control etc.)?  Is there a need to repair, mantain, or improve good housekeeping controls (clean track out pad sweeping, construction materials management, eritrash control post down, fueling areas, concrete wash out area, proper curb ramps, spill prevention, etc.?  Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)?  Are there places where BMPs are needed and should be installed or not needed and should be removed?  COMMENTS AND CORRECTIVE ACTIONS FOR SWPP COMPLIANCE  To retail a propriet in a subject	Has the SWPPP been upda	ated to reflect the current site conditions	s (modifications dated & initialed on site map, new BMPs on site map, discontinued	x	
me &qualifications weather problems/repairs, corrective action, new BMPs, emoved BMPs, discharges, etc.)  Whave all corrective action previous inspections been addressed and documented within the lime farme allotted by the inspector?  Are SW flows entering and leaving the construction site controlled, managed or diverted around the site? (e.g. perimeter controls, berms, sill fence, gradient boundary, sediment control, etc.)  Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations?  Is there evidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a vidence of vehicles tracking soil of the construction site?  Is there a near to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulcin, vegetated strips, rip rap, surface (pitenting) pipe slope drain, dust control, etc.)?  Is there a near to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulcin, vegetated strips, rip rap, surface (pitenting) pipe slope drain, and sust control, etc.)?  Is there a near to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets or large strips, rip rap, surface (pitenting) pipe slope and surface strips, rip rap, surface (rotate) pipe slope and surface strips, rip rap, surface (rotate) pipe slope and surface strips, rip rap, surface (rotate) pipe slope and surface strips, rip rap, surface (rotate) pipe slope and surface strips, rip r					+
Are SWM flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, slif fence, gradent boundary settlement control etc.)  Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations?  Is there evidence of vehicles tracking soil off the construction ste?  Is there evidence of vehicles tracking soil off the construction ste?  Is there self-construction material, andiscaping terms, or other debns piled on impervious surfaces (roads, drives) that could be washed with SW to a pile of the property stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface sphering, pipe slope drain, dust control, etc?  Is there a need to repair, maintain, or improve sediment control BMPs (sit fence, check dams, fiber roils, sediment trap/basin, iniet protection, waddles, as better a need to repair, maintain, or improve sediment control BMPs (sit fence, check dams, fiber roils, sediment trap/basin, iniet protection, waddles, as better as need to repair, maintain, or improve sediment control BMPs (sit fence, check dams, fiber roils, sediment trap/basin, iniet protection, waddles, as better as need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrasts nontrol port-o-potities staked down, fueling areas, concrete wash out area, proper cutrior ramps, spill prevention, etc.)?  Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)?  Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)?  **COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE**  In it is a propriet and its location.
