## Basis for Issuance of Conditional Use Permit

Reasonably anticipated detrimental effects of a proposed conditional use can be substantially mitigated by the proposal or by the imposition of reasonable conditions to achieve compliance with applicable standards. Examples of potential negative impacts are odor, vibration, light, dust, smoke, or noise.

We have located as area out of sight where we propose to move all being and prepare a sate, out of sight and sound area to process the material. The stage site will be over 1600 feet away from the Mentert homes. This area is surrounded by hillsides that block any view and sound from surrounding homes in all directions. In addition, a being will be built aloung the South end of the site to further isolate sound and view. This been will block and send the sound wave verticle into the atmosphere away from existing homes. Site is virtually at the furthest point from traffic and homes. Hours of operation for material Processing

That the proposed use will comply with the regulations and conditions specified in the Zoning Ordinance and other applicable agency standards for such use.
