

Public Roadway Access

Powder Mountain is committing to a public road right of way that will enable a secondary roadway link thru the resort to the east via Cache County. This public access road right of way would utilize Powder Mountain Road, Summit Pass and this proposed roadway to provide a feasible point of connection for a future roadway access to the east. This stub is being provided at a point adjacent to the Stonefield, Inc. parcel within Cache County and is stubbed at a location with topography that is feasible for a roadway extension. Any roadway alignment provided further east of this point is off of the subject property and would therefore require those property owners to provide access. This access extension, design, location etc. is to be determined at a later date and is not part of this rezone application.
