		Estimated Start Date 8 /19/ 2014	Actual Start Date

Submittal Checklist

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.
Site Plan: The date that the applicant submits a site plan application or amended site plan.
Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.
Land Use Permit: The date that the applicant submits a land use permit application.
Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-costruction meeting is required before performing any on-site earth work, unless waived by the county engineer.

Applicant Narrative

Please explain your request.
New construction of a single family home.

Owner or Authorized Representative Signature 	Date 8-15-2014
Signature of Approval 	Date 8-15-14

STORM WATER POLLUTION PREVENTION PLAN

Vaughan residence
4416 N. 4150 E
Sheep Creek
Liberty UT.84310

- (1) Approx. 7000 sq ft. of area will be disturbed for the project.
- (2) Peterson Builders Inc., will be responsible for the conditions at the site during construction.
Project Manager and Superintendent: Stan Berniche
Phone 801-648-4501
Email: stan@petersonbuilders.com
- (3) BMP's will be installed to help control storm water on site, (see site plan).
- (4) Materials from the excavation will be distributed on site or hauled off site for disposal.
- (5) The site plan submitted with this sheet shows the locations of the concrete wash out, dumpster and portolet. The portolet will be staked down to help prevent overturning in stormy weather.
- (6) The site plan submitted with this sheet also shows the location of the construction access, which will be built in the same location that the permanent drive way will be. It will be composed of pit run and gravel. The permanent drive way will be concrete or asphalt. A 12 "culvert will be installed under where the drive access will be, as per Weber County Engineering.
- (7) Track out will be handled in a timely fashion. It shall be removed by scraping or sweeping. /
- (8) There is shallow swale on the frontage of the property that runs along 4150 E. it will be protected with silt fence or other BMP's such as straw waddle's or sand socks.
- (9) Storm water that flows on site currently flows in a North Westerly direction, the lot is relatively flat with existing grade sloping slightly to the North West. After construction, storm water should continue to flow across the lot in a North Westerly direction.
- (10) Currently there are no other occupations on this property.

Vaughan

4416 N. 4150 E. Liberty
