upgradient boundary diversion, down gradient boundary sediment control etc.) 7. Is there evidence of sediment discharge such as multi-flows or soil deposits from the construction site in downstream locations? 8. Is there evidence of sediment discharge such as multi-flows or soil deposits from the construction site in downstream locations? 8. Is there are evidence of vehicles tracking soil of the construction site? 9. Is there are construction material, landscaping items, or other debtors piled on impervious surfaces (roads, drives) that could be washed with SW to a storm drain or water body? 10. Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankes, mulch, vegetated strips, rip rap, surface roughleing, pipe slope drain, dust control, etc?? 11. Is there a need to repair, maintain, or improve egood housekeeping controls (clean track out pad, sweeping, construction materials management, littler/trash control, porto-potities staked down, fueling areas, concrete wash out area, proper curv ramps, spill prevention, etc? 13. Are there distribed areas that have not had construction activities for 14 bit 21 days without stabilization? (recepts) amount of topics, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, littler/trash control, porto-potities staked down, fueling areas, concrete wash out area, proper curv ramps, spill prevention, etc? 13. Are there distributed areas that have not had construction activities for 14 bit 21 days without stabilization? (recepts) and on the property from the property in a contrash and should be installed or not needed and should be removed? 14. Are there places where BMPs are needed and should be installed or not needed and should be removed? 15. COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE 16. Comment of the property of the property of the property of the property in a second property in a second property in a second property in a second property	6. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, herms, sitt fence	X		
3. Is there evidence of vehicles tracking soil of the construction site? 3. Is there soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a storm drain or water body? 10. Is there a need to repair, maintain, or improve ercsion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface roughening, pipe slope drain, dust control, etc)? 11. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, little first control, porto-poties staked down, fueling areas, concrete wash out area, proper curv ramps, spill prevention, etc)? 13. Are there distributed areas that have not had construction activities of rt 4 oz 1 days without stabilization? (except snow or frozen ground)? 14. Are there places where BMPs are needed and should be installed or not needed and should be removed? **COMMENTS AND CORRECTUSE ACTIONS FOR SUPPIP COMPLIANCE** **Comments and its location.** If appropriate, describe fin general terms with reacts to be complete. However, only qualified (e.g., you are a designer) should you be mandating specific BMPs to reside the date when correctors are made. **Implication of a supplication of the supplication of the date when correctors are made.** **Implication of a supplication of the	upgradient boundary diversion, down gradient boundary sediment control, etc.)	X		
3. Is there soil, construction meterial, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a storm drain or water body? 10. Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface roughening, piles abope drain, dust control, etc?) 11. Is there a need to repair, maintain, or improve ediment control BMPs (allt fence, check dams, fiber rolls, sediment traphasin, inlet protection, waddles, straw balls, cure out-back, etc?) 12. Is there a need to repair, maintain, or improve ediment control BMPs (allt fence, check dams, fiber rolls, sediment traphasin, inlet protection, waddles, straw balls, cure out-back, etc?) 12. Is there a need to repair, maintain, or improve edoment of housekeeping control (clean track out pad, sweeping, construction materials management, interference). 13. Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)? 14. Are there places where BMPs are needed and should be installed or not needed and should be removed? 15. Are there places where BMPs are needed and should be installed or not needed and should be removed? 16. Are there places where BMPs are needed and should be installed or not needed and should be removed? 17. Are there places where BMPs are needed and should be installed or not needed and should be removed? 18. Are there places where BMPs are needed and should be installed or not needed and should be removed? 19. Are there places where BMPs are needed and should be installed or not needed and should be removed? 19.
