### REVIEW STATUS: APPROVED

### SPECIFIC COMMENTS:

1. Fire Hydrant(s): Fire hydrants locations shown on the drawings are approved. The maximum spacing between hydrants in a residential area is 500 ft.
2. Provide a temporary address marker at the building site during construction.
3. Roads shall have a minimum clear and unobstructed height of 13'-6" and shall be capable of supporting a 75,000 pound load.
4. Roads shall have a maximum grade of 10% unless specifically approved as outlined by the International Fire Code.
5. Radius on all corners shall be a minimum of 28'-0".
6. Dead end fire apparatus access roads in excess of 150 feet in length shall be provide with an approved area for turning around fire apparatus constructed with the same requirements as the roads.
7. Roads and bridges shall be designed, constructed and maintained to support an imposed load of 75,000 lbs.
8. All roads shall be designed, constructed, surfaced and maintained so as to provide an all-weather driving surface.
9. Fire access roads for this project shall be completed and approved prior to any combustible construction. Temporary roads shall meet the same requirements for height, width and imposed loads as permanent roads.
10. All required fire hydrants and water systems shall be installed, approved and fully functional prior to any combustible construction.

## Plan Review

Every effort has been made to provide a complete and thorough review of these plans. This review does not relieve the owner, contractor and/or developer from compliance with any and all applicable codes and standards. Any change or revision of this plan will render this review void and will require submittal of the new or revised layout for fire department review.
