

CUP narrative

**7305 East 730 North
Hunstville, UT, 84317**

- AT&T is requesting approval to replace outdated antenna equipment with new models. New equipment will be installed at the same centerline that the existing equipment is currently installed. Site plan showing the equipment to be removed and the replacement equipment has been provided.
- There are no changes to the tower height or size being proposed.
- There is no expansion of the compound being proposed.
- The site is unmanned and has no water or waste water associated with it.
- There is no landscape plan proposed as the only request is to modify antennas on the tower. There will be no change to anything on the ground.
- The site is secure and not accessible to the public there is room inside the existing compound for maintenance vehicles to park and no public parking spaces are provided.
- There is no change to any lighting associated with this project
