(inspector ame & qualified person on a weekly or binwesky basis, reporting items required by permit? (inspector ame & qualified person on a weekly or binwesky basis, reporting items required by permit? (inspector) **Are serviced or devidence and discharge such as mud flows or soil deposits from the construction set in downstream locations? **Is there a roll, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a construction of the construction set of the person of the person of the construction with set of the person of persons who manys the system of the person of the person of the person	. Is the SWPPP	on site and accessi	ble, or is the SWPPP loc	ation posted in an obvio	ous place and re	asonably accessib	e (in a short time)?	Y		_
- Has the SVPPP been updated to reflect the current site conditions (modifications dated & initiated on site map, new BMPs on site map, discontinued MPs crossed of site map, new BMPs on site map, discontinued MPs crossed of site map, new BMPs on site map, discontinued MPs crossed SIMPs (site map, new BMPs) and site map, discontinued MPs crossed SIMPs, discontinued MPs crossed SIMPs, discontinued by permit? (rispector map department control separate site of the site of t	2. Are erosion cor	ntrol, sediment conti	rol, and good housekeepi	ing BMP's installed on	the site as shown	in the SWPPP2			K	4
Are on-tale inspections being performed and recorded by a qualified person on a weekly or biweekly basis, reporting items required by permit? (inspector mane équalification, weather, problemarfiparis, corrective action new IMPs, removed IMPs, removed IMPs, (sicharges, etc.). Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector? Are SW More intering and leaving the constructions been addressed and documented within the time frame allotted by the inspector? Are SW More intering and leaving the construction size or controlled, managed, or divised around the size? (e.g. perimeter controls), berms, silt fence, predict boundary diversion, down gradient boundary sediment control, etc.)? Is there evidence of vehicles tracking soil of the construction size? Is there evidence of vehicles tracking soil of the construction size? Is there evidence of vehicles tracking soil of the construction size. Is there evidence of vehicles tracking soil of the construction size of the construction material, landscaping items, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a construction state of the construction size of the construction state of the construction size of the construction state of the construction	. Has the SWPP	P been updated to	reflect the current site cor	nditions (modifications	dated & initialed	on site map, new l	BMPs on site map, discor	ntinued	_	+
The equinications, wealties, protections are controlled, not make the protection and concurrence within the time frame allotted by the inspector? Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, slit fence, profatelin boundary sendent boundary sediment control, and deposits from the construction site or diversion, down gradient boundary sediment control deposits from the construction site of whiches tracking sold in the construction site? Is there evidence of sediment discharge such as mud flows or soll deposits from the construction site in downstream locations? Is there evidence of sediment discharge such as mud flows or soll deposits from the construction site in the service of sediment discharge such as mud flows or soll deposits from the construction site in downstream locations? Is there soll, construction material, landscaping items, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a surface soll, construction material, landscaping items, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a surface soll, construction material, landscaping items, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a surface soll, and the surface of the surfa	. Are on-site insp	pections being perfo	rmed and recorded by a c	qualified person on a w	reekly or himaekly	hasis renorting it	ams required by namit?	/lagageter		1
Are SW flows entering videxion, down gradient boundary sediment control etc.) Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations? Is there evidence of vehicles tracking soil off the construction site? Is there evidence of vehicles tracking soil off the construction site? Is there soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a stress soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a last that the soil of the construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a last that the soil of the second of the	arrie aqualification	oris, weather, proble	ms/repairs, corrective ac	tion, new BMPs, remov	ved BMPs, discha	arges etc.)		(inspector		
is there evidence of sediment discharge such as multi-low or so ill deposits from the construction site in downstream locations? Is there evidence of sediment discharge such as multi-low or so ill deposits from the construction site in downstream locations? Is there evidence of vehicles tracking soil off the construction site? Is there so evidence of vehicles tracking soil off the construction site? Is there so evidence of vehicles tracking soil off the construction site? Is there are evidence of vehicles tracking soil off the construction site? Is there are destructed material, landscaping items, or other debtris piled on impervious surfaces (roads, drives) that could be washed with SW to a construction material, and construction materials are sold to the pragit, maintain, or improve sediment control BMPs (emporary stabilization, erosion blankets, mulch, vegetated strips, fip rap, surface upghering, pipe slope drain, dust control, exp?, and it is there a need for pragit, maintain, or improve sediment control BMPs (emporary stabilization, erosion blankets, mulch, vegetated strips, fip rap, surface upghering, pipe slope drain, dust control, exp. and the pragit maintain, or improve sediment control BMPs (emporary stabilization, erosion blankets, mulch, vegetated strips, fip rap, surface upghering, pipe slope drain, dust control, exp. and the pragit maintain, or improve sediment control BMPs (emporary stabilization, erosion blankets, mulch, vegetated strips, fip rap, surface and surface transmitted or pragit, maintain, or improve sediment control BMPs (emporary stabilization, erosion strips, stabilization, erosion stransmitted in surface and strips, curried control, exp.)? Is there a need for pragit, maintain, or improve sediment control BMPs (emporary stransmitted for surface) and strips, curried control, exp. (exp.) Is there a need for pagit, maintain, or improve sediment control BMPs (emporary strips,	Are SW flows e	ive action items from	n previous inspections be	een addressed and doo	cumented within	the time frame allo	tted by the inspector?	-		1
is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations? Is there evidence of evidicide stacking soil of the construction site? Is there soil, construction material, landscaping terms, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a sum dain or valet body? Is there soil, construction material, landscaping terms, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a sum dain or valet body? Is there a need to repair, maintain, or improve erosion control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inter protection, wattles, surface), pipe slope drian, dust control, etc? Is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inter protection, wattles, surface), as better as the repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inter protection, wattles, surface), as better as the oregin and surface of the pile of	ogradient bound	ary diversion, down	gradient boundary sedime	ent control, etc.)				fence,	×	Ī
Is there so (nonstruction material, landscaping teams, or other debris piled on Impervious surfaces (roads, drives) that could be washed with SW to a prim drain or water body? Is there so (nonstruction material, landscaping teams, or other debris piled on Impervious surfaces (roads, drives) that could be washed with SW to a prim drain or water body? Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated stips, rip rap, surface upleheling, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve ediment control BMPs (silt fence, check dams, fiber rolls, sediment traphbasin, inlet protection, wattles, as better a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, arthrash control, port-o-potites staked down, fueling areas, concrete wash out area, proper cuth ramps, selli prevention, etc)? Are there disturbed areas that here on that construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)? Are there places where BMPs are needed and should be installed or not needed and should be removed? COMMENTS AND CORRECTIVE ACTIONS FOR SUPPO COMPLIANCE with the problem and its location. If appropriate, describe fing general terms) what makes the exceptions. However, only of qualified (e.g., you are a designed) should you be mandating spect in the problem and its location. If appropriate, describe fing general terms) what makes the beautiful for the purson or pursons who manage are system. A system designed to assure that qualified personnel proper cotor, please list all applicable SEV codes: Cotor, please list all applicable SEV codes: The problem and its location. If appropriate, and all attended and any any and any and any and any any and any and any	Is there evidence	ce of sediment disch	arge such as mud flows	or soil deposits from the	e construction sit	e in downstream l	ocations?		1	+
List bare a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface uphening, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve erosion control BMPs (slit fence, check dams, fiber rolls, sediment traphasin, inite protection, wattles, sughening, pipe slope drain, dust control, etc)? Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, entrement ontrol, port-o-potities staked down, fueling areas, concrete wash out area, proper curb ramps, spill prevention, etc)? Are there distincted areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozon ground)? Are there distincted areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozon ground)? COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE Infly the problem and its location. If appropriate, describe fin general termsy what needs to be completed, However, only qualified (e.g., you are a designer) should you be mandating specific breath and a stabilization? (e.g., pour are a designer) should you be mandating specific breath and the final stabilization and its location. If appropriate, describe fin general termsy what needs to be completed. However, only qualified (e.g., you are a designer) should you be mandating specific breath and the final stabilization and the final stabilizat	Is there evidence	e of vehicles tracking	g soil off the construction	n site?					1	7
List brief a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber rolls, sediment traphasin, inlet protection, wattles, aw balls, curb out-back, etc? Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, artificate control, port-o-potties staked down, fueling areas, concrete wash out area, proper cuth ramps, spill prevention, etc)? Are there distincted areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)? Are there distincted areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)? Are there places where BMPs are needed and should be installed or not needed and should be removed? COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE Infly the problem and its location.
