Approved: Yes

Notes

I have had a chance to review the plan(s) as well as the "Not Approved" reviews and have the following comment(s):

1. Since the reviews by Alan Taylor and Dana Shuler were posted, subsequent drawings have been submitted addressing the areas of concern. Primarily, the geological, geotechnical and engineering concerns regarding the watering of the lot, stabilization of the lot post-construction, height of the retaining walls and grading of the lot. I am satisfied with how the concerns were addressed and approve the hillside review on behalf of the engineering department.

I have tried to address all items of concern from the Engineering Department. However, this review does not forego other items of concern that may come to this department's attention during additional reviews or during construction of improvements. If you have any comments or questions concerning this review, feel free to contact me.
