Subject: Summit Eden Phase 1C Lot 39R - Engineering Review 2

Please see questions below

1. Guardrail modification must be engineered and submitted. Modification to be performed by approved contractor only. DANA -- Please confirm this something that will be produced by Weber County. Homeowner will need to submit engineered design.
2. Substitute slope easement must be submitted, prior to Certificate of Occupancy. ALL -- Is this moving forward? I was told there was a draft in place. JW -- have you seen this? We are working on draft language.

--
