**RE: Questions regarding CUP 2010-22 (ATK Conference Center)**

Dear Mr. Hatfield:

In response to the question Mr. Michael Tuttle of the Weber County Engineering Department raised regarding the pipes that leave the building and discharge into the stream, the pipes are used for overflow for the well that sits on the property. When the well reaches a certain level, the well water is discharged into the river to prevent flooding.

Please let me know if you have any additional questions or concerns.

Regards,
