		Estimated Start Date 7/1/2016	Actual Start Date

Submittal Checklist

The application shall include a Storm Water Pollution Prevention Plan which meets the criteria set forth in Section 33-3-4 of the county ordinances.

The applicant shall file the application on or before the following dates:

Subdivision: The date that the applicant submits the preliminary subdivision development plat application.
Site Plan: The date that the applicant submits a site plan application or amended site plan.
Building Permit: The date that the applicant submits a building permit application if the applicant proposes to construct a building on an existing lot or parcel.
Land Use Permit: The date that the applicant submits a land use permit application.
Other: At least two (2) weeks before the developer intends to perform any type of work not listed above that would require a Storm Water Construction Activity Permit pursuant to this Chapter.

Failure to acquire a required Storm Water Construction Activity Permit is grounds for tabling a related subdivision application, site plan application, conditional use permit application, or building permit application. It is unlawful to commence work (move dirt) on a development site before obtaining a required Storm Water Construction Activity Permit.

Note: A pre-construction meeting is required before performing any on-site earth work, unless waived by the county engineer.

Applicant Narrative

Please explain your request.
Construction of a residential home

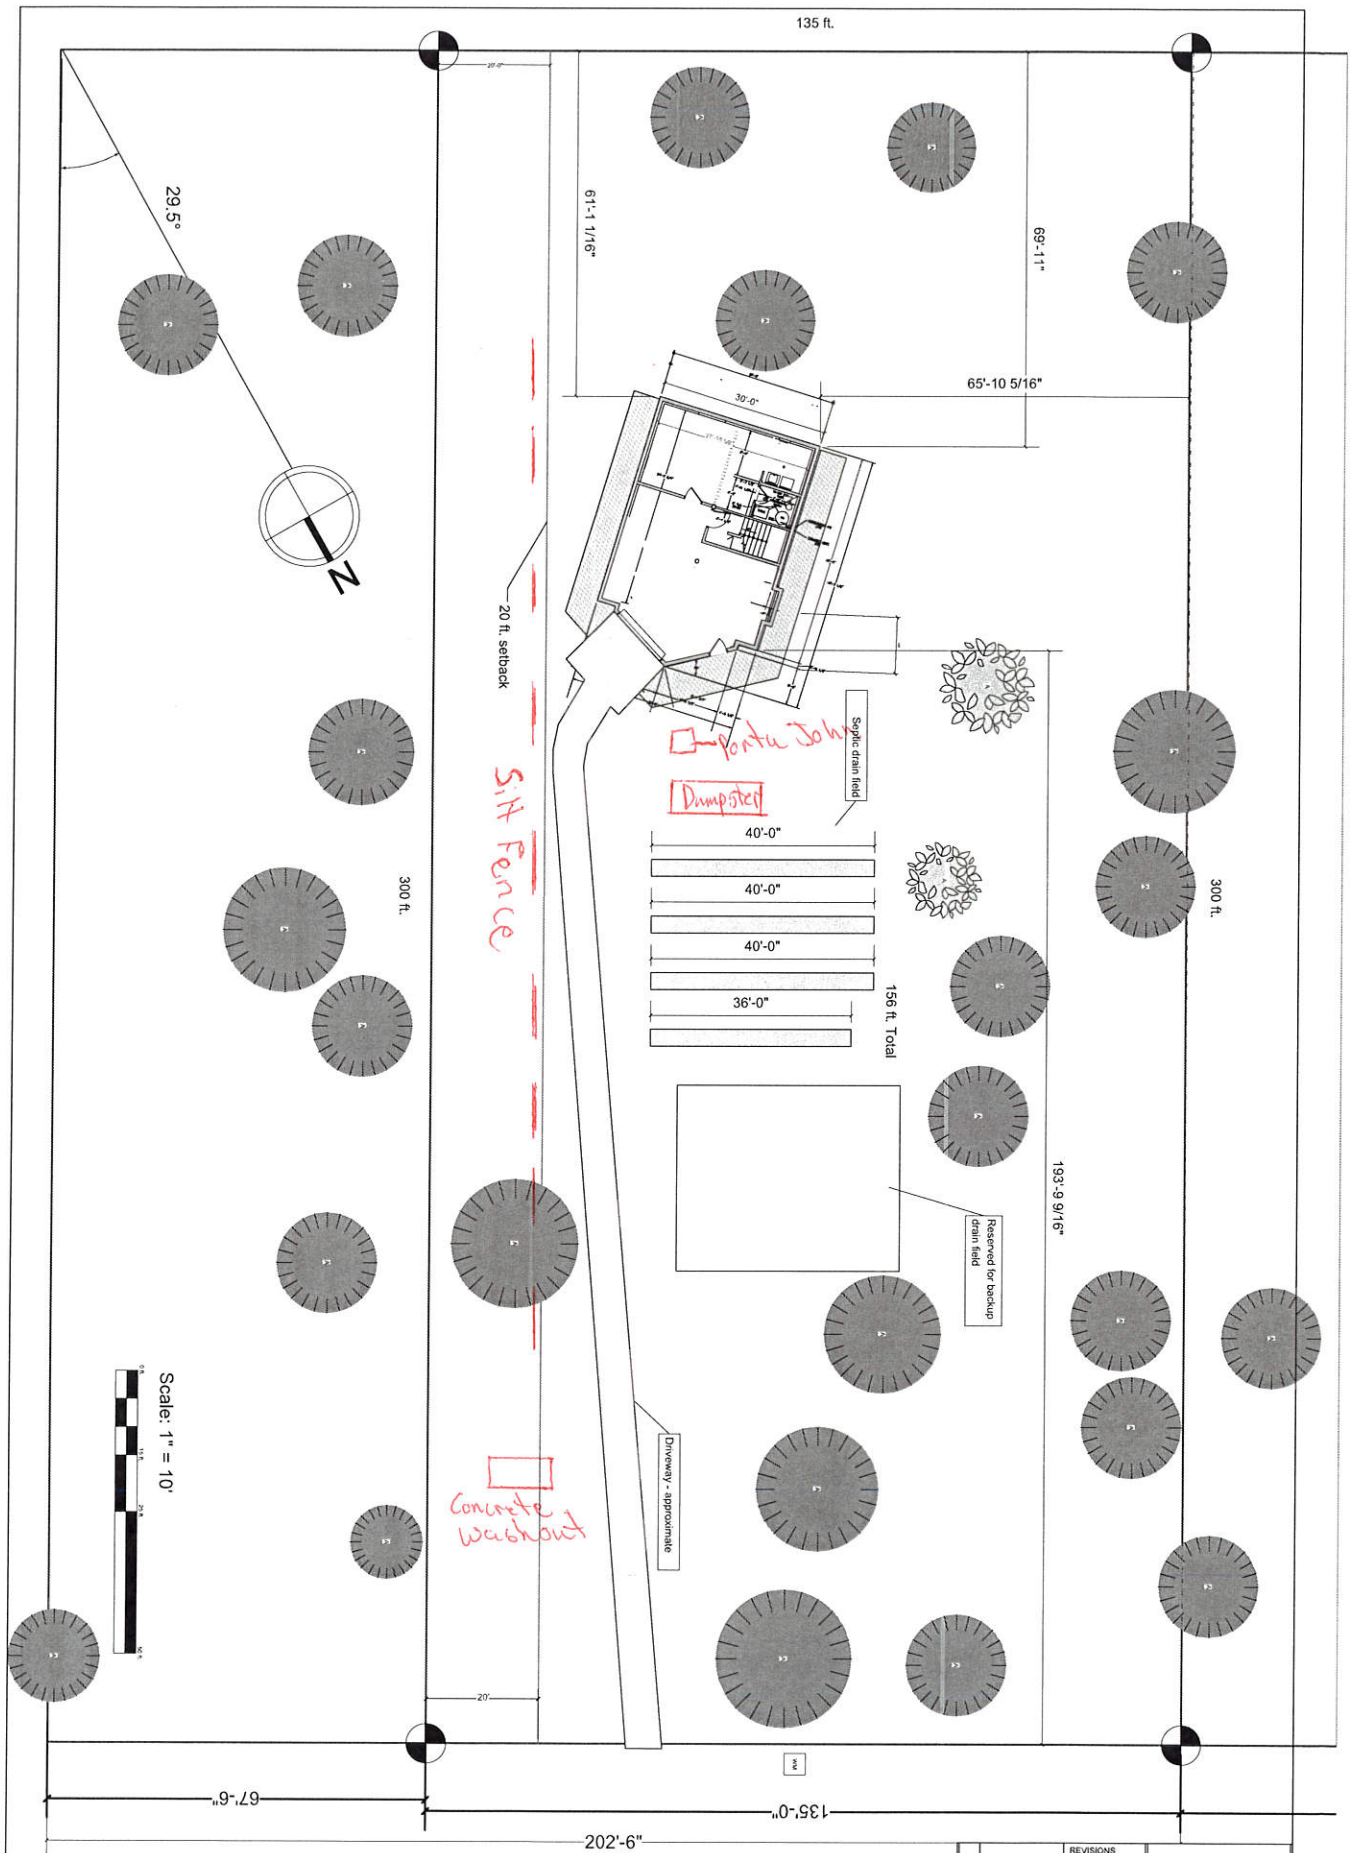

Authorization

By signing below the Owner / Representative authorizes the county to enter the property to perform inspections.

Owner or Authorized Representative Signature <i>[Signature]</i>	Date 6/8/2016
Signature of Approval <i>[Signature]</i>	Date <i>6-13-16</i>

Weber County SWPPP
Project Name: Mark Purrington

1. How much area will be disturbed?
 - a. $\frac{1}{4}$ acre
2. Who will be responsible for the conditions of the site during construction?
 - a. Logan Young, 801-644-3261
3. What will be done to prevent the neighbors from being affected by the proposed construction activities?
 - a. Construction will be conducted during reasonable hours of the day. Property will be maintained through proper material and waste management.
4. What will be done with all excavated material temporarily and permanently?
 - a. No soil will be removed from site. All soil will be used as fill or in landscaping the property.
5. Where is the concrete washout and how will it be maintained?
 - a. Concrete washout will be provided near the drive way entrance. (See site map) Once the concrete dries up it will be hauled away.
6. Where are the porta-johns located and how are they installed?
 - a. The porta-john will be located near the proposed home (see site map) It will be installed on a flat surface by the porta john provider
7. How will the construction entrance be built and where will it be located?
 - a. The construction entrance will be built using a road base to minimize track out sediment onto the streets. The entrance will be located where the future driveway to the home will be. (See site map)
8. What will you do when mud and/or dirt gets tracked on the asphalt?
 - a. If mud and dirt gets tracked onto the asphalt it will be swept off the best we can.
9. Is there a drainage ditch or swale on or near you property? How will it be protected?
 - a. There is a ditch located on the north side of the property. Silt fence will be installed as needed to help stop debris from getting to the ditch.
10. What currently happens to the rain/storm water when it reaches the project site?
 - a. Any storm water that reaches the project site is currently absorbed into the existing vegetation.
11. Show all existing occupation on the property?
 - a. There is no existing occupation on the property.
