SWPPP, EROSION, SEDIMENT AND HOUSEKEPING EMP; INFORMATION  1.1 at the SWPPP on sits and accessible, or is the SWPPP location posted in an obvious place and reasonably accessible (in a short time)?  2. Are ended no control, sediment control is swipped to a state of the site as a shown in the SWPPP?  3. Has the SWPPP been updated to reflect the current site conditions, prodifications of state in site map, new BMPs on site map, discontinued  MPs crossed off site map, new BMPs details, a seed in SWPPP SWPPP amments and security of the site of t		Cle): Type Code (circle): 1-Municipal 2 Industrial 2 State	_		
1.1. Is the SWPPP on site and accessible, or is the SWPPP location posted in an obvious place and reasonably accessible (in a short time)?  A care ecosin control, sediment control, and pood housekeeping BMPs insided on the like as shown in the SWPPP.  A care shown in the SWPPP been updated to reflect the current site conditions (modifications stand & initiated on site map, new BMPs and site map, new BMPs details is specif in SWPPP. SWPPP ammended and initiated on site map, new BMPs and site map, new BMPs on site map, discontinued.  A care on a site inspections being performed and recorded by a qualified person on a weekly rebeauty in the site of	Code (Circle). Sw non-sampling	(L) Local	a 		
2. Are encion control, sediment control, and good housekeeping BMPs Installed on the site as shown in the SWPPP?  3. Insta the SWPPP been updated to reflect the current site conditions (modifications dated is initiated on site map, new BMPs on site map, discontinued BMPs crossed off site map, new BMP defails is appect in SWPPP, SWPPP amendment Log, etc.)?  4. Are on-alle inspections being performed and recorded by a caulified person an avealty of blowely basis, reporting tenns required by permit? (Inspector parms exquilifications, weather, problem/repairs, corrective action, new BMPs, encoved BMPs, discharges, etc.)  5. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g., permeter controls, berms, sit fence, paggradient bounday as definited touchay as definited controlled, managed, or diverted around the site? (e.g., permeter controls, berms, sit fence, legistration of verification and provides a tracking and leaving the construction site controlled, managed, or diverted around the site? (e.g., permeter controls, berms, sit fence, legistration of verification and provides around the site? (e.g., permeter controls, berms, sit fence, legistration of verification and provides around the site? (e.g., permeter controls). Berms, sit fence, legistration and provides around the site? (e.g., permeter controls) berms, sit fence, legistration and provides around the site? (e.g., permeter controls). Berms, sit fence, legistration and provides around the site of verification and verification and provides around the site of verification and verificati			YES	No	N/
3. Has the SWPPP been updated to reflect the current site conditions (modifications dated & initiated on site map, new BMPs on alter map, new BMPs on site map, discontinued MMPs crossed of site map, new BMPs details a specie in SWPPP. SWPPP amendment Log, etc.)  4. Are on-site inspections being performed and recorded by a qualified person on a weekly or bisvesky basis, reporting items required by permit? (inspector parmer equalification, weather, problement/grapts, corrective action, new BMPs, removed BMPs, discharges, etc.)  5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?  5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?  5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?  5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?  5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?  5. Have all corrective action internations and addressed and documented within the time frame allotted by the inspector?  5. It is there a read of sediment discharge such as multiple value of the construction and the state of the construction and the constru				X	
MPS crossed off site map, new MMP details & specie in SWPPP, SWPPP amendment Log, etc.)  A re an entil inspection barity performed and recorded by a qualified person and weekly or blowerkly basis, reporting items required by permit? (Inspector arms exqualifications, weather, problems/repairs, corrective action, new MMPs, removed MMPs, discharges, etc.)  A real wall correctly action that is more previous impections to be addressed and documented within the time frame allotted by the inspector?  X is a first wall correctly deversion, drong previous impections been addressed and documented within the time frame allotted by the inspector?  X is the real developed of well-not be taxing and obtained to managed, or diversed around the site? (e.g., perimeter controls, berms, sit fence, againgted brounding of developed of well-not because good of the construction site of construction after an end to exhibit the state good of the construction site?  Is there evidence of sediment discharge such as mud flows or sail deposits from the construction site in downstream locations?  Is there evidence of sediment discharge such as mud flows or sail deposits from the construction site in downstream locations?  Is there evidence of sediment discharge such as mud flows or sail deposits from the construction site in downstream locations?  Is there evidence of vehicles texticing all of the construction site?  Is the real new or developed texticing and the sail of the construction site of the construction materials, and the sail of the construction of the sail of the construction materials and the sail of the person of the construction materials and the construction mate	Has the SWPPP been updated to reflect the current site	conditions (modifications dated & initialed on site man, new RMPs on site man, discontinued			2
rame Acquaillications, weather, problems/repairs, corrective action, new BMPs, temoved BMPs, discharges, etc.)  A res Will force action tems from previous inspections been addressed and documented within the time frame allotted by the inspector?  A res Will flower action tems from previous inspections been addressed and documented within the time frame allotted by the inspector?  A res Will flower action that the provision of the control of the previous provision and the previous action of the previous and the previous action of the previous actions of the previous action of the previous action of the previous action of the previous action of the previous actions of the previous action action of the previous action does not be paid, maintain, or improve action of the previous action of the previous action action activities for 14 to 21 days without stabilization? (except a rew or force ground)?  A rether a flactuated areas that have not had construction activities for 14 to 21 days without stabilization? (except area of the previous actions activities action activities action activities activiti	BMPs crossed off site map, new BMP details & spec's in S1	WPPP, SWPPP amendment Log. etc.)?			1
5. Have all corrective action letters from previous inspections been addressed and documented within the time farme allotted by the inspector?  A PAR SM flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silf fence, upgraded boundary diversion, down gradient boundary sediment control, etc.).  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there evidence of vehicles tracking soil off the construction site?  It is there a need to repair, maintain, or improve erosion control BMPs (sitt fence, check dams, fiber roils, sediment trapbasin, fivel protection, watties, tracking soil or peak in maintain, or improve sediment control BMPs (sitt fence, check dams, fiber roils, sediment trapbasin, rise protection, watties, tracking soils, or improve good housekeeping control statistics, sediment trapbasin, rise protection, watties, tracking soils, or improve good housekeeping control statistics, sediment trapbasin, rise protection, watties, tracking soils, or improve good housekeeping control statistics, sediment trapbasin, rise protection, watties, tracking soils, sediment trapbasin, sedim	<ol> <li>Are on-site inspections being performed and recorded by name &amp;qualifications, weather, problems/repairs, corrective</li> </ol>	y a qualified person on a weekly or biweekly basis, reporting items required by permit? (Inspector			1
3. Are SM flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, sill fence, perimeter controls are under construction sile in downstream locations?  It is there evidence of sediment discharges such as mud flows or soil deposits from the construction sile in downstream locations?  It is the ser evidence of sediment discharges such as mud flows or soil deposits from the construction sile in downstream locations?  It is there evidence of sediment discharges such as mud flows or soil deposits from the construction sile in downstream locations?  It is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inlet protection, watters walls, cute cutesock, etc?  It is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inlet protection, watters, the walls, check checks, etc.)  It is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inlet protection, watters, the walls, check checks, etc.)  It is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber roils, sediment trapbasin, inlet protection, watters, the wall checks and to repair improve protection, activities for 14 to 21 days without stabilization? (excepting, serior, etc.)  As the redisturbed areas that have not had construction activities for 14 to 21 days without stabilization? (excepting protection, etc.)  COMMENTS AND CORRECTIVE ACTIONS FOR SWDPP COMPLIANCE  Perify the problem and its location. It appropriate, describe (in period and and salval and the information, between the interest of the sed of the period of the period of the period	5. Have all corrective action items from previous inspection:	is been addressed and documented within the time frame allotted by the inspector?	-	V	,
It is there evidence of sediment discharge such as must flows or soll deposits from the construction site in downstream locations?  It is there evidence of vehicles tracking soll off the construction site?  It is there as construction material, landscaping items, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a torm drain of waller body?  It is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface outpilenting, pipe slope driving, dust control, etc)?  It is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber rolls, sediment traphtasin, inlet protection, wattles, trave balls, curb cubtack, etc?  It is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, trave balls, curb cubtack, etc?  It is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, trave balls, curb cubtack, etc?  It is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, trave balls, curb cubtack, etc?)  It is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, traveled, curb curb curb curb curb curb curb curb	<ol><li>Are SW flows entering and leaving the construction site of</li></ol>	controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silt fence	1-	^	_
Is there evidence of vehicles tracking soli of the construction stell?  Is there sell, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a lot of the stell of the self-body?  Is there and construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a lot of the self-body?  Is there a need to repair, maintain, or improve evenion control BMPs (sitt fence, check dams, fiber roils, self-ment traptbasin, inlet protection, wattles, that is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, that the control, port-o-potales staked down, fueling areas, concrete weath out area, proper courb ramps, self-prevention, etc.?  Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, therit track control, port-o-potales staked down, fueling areas, concrete weath out area, proper courb ramps, self-prevention, etc.?  Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, therit track control, port-o-potales staked down, fueling areas, concrete weath out area, proper courb ramps, self-prevention, etc.?  Is there a need disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except anow or frozen ground?)?  COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE  another problem and its location. If appropriate, describe (in general terms) with resolute the observation and its lateral analysis of security the problem and its location. If appropriate, describe (in general terms) with resolute the described of the problem and its location.
