**NARRATIVE**

The purpose of the survey is to create a 3 lot subdivision. The access Right-of-way shown is not being dedicated as a public or private road and is being granted by the county as an Access Exception. The basis of bearing is as noted in the boundary description. The boundaries of this subdivision are controlled by a few documents and lines of historical occupation. The North boundary is identified as being 40 feet south of the centerline of Highway 162 which centerline has been identified from the Valley Elementary School Subdivision plat (recorded Plat book 70 page 72 and a filed survey number of 4306) to the east of this property. The 40 foot offset is required by County Engineering. The South boundary of the property has been determined to be a long standing fence that stretches from the quarter section line on the east to the location that it makes a bend in the northwest near the southwest corner of this parcel. I have worked on several parcels previously that bear out the location of the fence as being collateral evidence of the Sixteenth section line, which this property was intended to use as the south boundary. The distance along a calculated section line running southerly from the Northwest corner to the intersection of this fence extended is 1326.67'. The original 1871 GLO plat for this section showed the line to be 80 chains, in 1971 the BLM did a dependent retracement of the section and prorated the Southwest corner of the section placing a length of 80.78 chains on this mile. The also show that the distance on the west line of Lot 4 (which this property resides in) is 20.195 chains (1332.87') and is quite close to the location of the fence line. The East boundary of this property has been identified by a record of survey done by Great Basin Engineering (County Surveyor file number 2734) for the parcel to the east currently owned by Page Family Testamentary Trust. In which GBE shows that the property boundary was held to be the long standing fence that runs from the southeast corner of this subdivision to the north. The also did not hole the existing fence line that is on the southwesterly side of an existing ditch. In this subdivision I have also held this fence as the property line and I have used the record distance of my property of 1028.28' from the Sixteenth section fence line running north before terminating that line of the property. This will extend my boundary a little north of what GBE has used but it is my opinion that in this situation holding the record for the 4 calls along the east boundary, related to State Plane, is the proper identification of the line of ownership. GBE has also utilized the Sixteenth fence line as the south boundary of their property. The West boundary of the subdivision has been the more challenging boundary to identify. Deeds in the chain of title have, by and large, lost the reference to the location of the Pineview-Eden Highway, which used to be known as a State Highway no. 162 but has now been mostly abandoned. There is still public use to access the lake along this section of road that fronts on this property. This road was deeded to
