Does the flood plain touch this subdivision? If so show it on the plat.

All existing structures located within and immediately adjacent to the subdivision need to be shown on the plat. Septic system and information (perc test etc.) need to be shown on the plat for all lots. The title report references a irrigation pumping station, pond, electrical lines, and piping for the benefit of lot 4. Where are these located and the necessary easements.

It looks like there was a pond built in this location. What is the separation to the septic system? Does the pond have a liner in it?

Between the old lot line of 12 & 4 there was a PUE. Will these be vacated? Are there utilities through them?

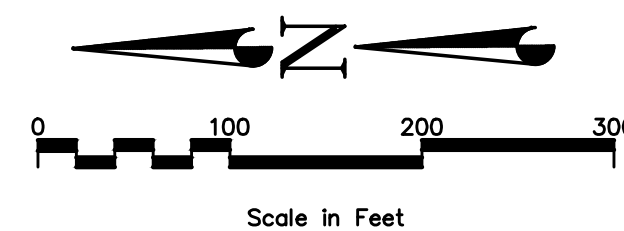

The drainage easement needs to remain on this lot.
