Туре	Rate	Rate/ Sq Ft	Sq Ft or # of Units	Total
Plan Review	Subdivision			\$50.00
				\$0.00
				\$0.00
				\$0.00
			Total Due	\$50.00

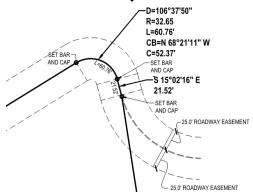

FEE NOTICE:

Weber Fire District has various fees associated with plan reviews, and inspections. Please be prepared to make payments at the time of inspections or when you pick up your approved plans. Impact Fees are due prior to taking out a building permit. Make checks payable to: **Weber Fire District**.

REVIEW STATUS: MAKE CORRECTIONS

SPECIFIC COMMENTS:

1. The road easement indicated on the drawing has a sharp "S" bend type configuration. I am concerned about the turning radius created in this area. The 2015 International Fire Code requires that the radius be a 28 Foot interior radius. If this is in conflict with county engineering standards, Weber Fire District will default to the county standard. Please address this concern.

- 2. Fire Hydrant(s): If water lines are available in the area that will support a hydrants, then hydrants must be provided within 400 feet of the furthest most portion of a building or facility (see IFC 507.5.1). The maximum spacing between hydrants in a residential area is 500 ft.
- 3. Fire Suppression Systems: As per the Utah Fire Code Act, "R" occupancies built in accordance with the International Residential Code may require fire

Plan Review

suppression systems if any of the following apply:

R Occupancy Built Under IRC Requirements

Structure is located in Urban-Wildland	May Require Fire
Interface Area	Suppression
Public Water Distribution System With	May Require Fire
Hydrants Does Not Exist	Suppression
Single Access Road With Grade Greater Than	May Require Fire
10% For More Than 500 Linear Feet	Suppression
Structure Is Larger Than 10,000 Square Feet	May Require Fire
(Total Floor Area Of All Floor Levels Within	Suppression
Exterior Walls Of Dwelling Unit)	
Structure Is Larger Than Double The Average	May Require Fire
Size Of The Unsprinklered Homes In The	Suppression
Subdivision (Total Floor Area Of All Floor	
Levels Within Exterior Walls Of Dwelling	
Unit).	

Weber Fire District strongly encourages the builder/owner to provide a fire suppression system to protect the lives and property of the occupants. These systems have been proven to provide effective lifesaving functions. You are encouraged to visit http://homefiresprinkler.org/ to learn more.

For more information, please contact the Fire Prevention Division at 801-782-3580.

- 4. Fire Access roads to any property shall have a minimum clear width of 20 feet (face of curb to face of curb) and a vertical clearance of 13 foot 6 inches and shall be capable of supporting a 75,000 pound load.
- 5. Roads shall have a maximum grade of 10% unless specifically approved as outlined by the International Fire Code.
- 6. Dead end fire apparatus access roads in excess of 150 feet in length shall be provide with an approved area for turning around fire apparatus constructed with the same requirements as the roads.

General Requirements:

- Roads and bridges shall be designed, constructed and maintained to support an imposed load of 75,000 lbs.
- All roads shall be designed, constructed, surfaced and maintained so as to provide an all-weather driving surface.
- Fire access roads for this project shall be completed and approved prior to any
 combustible construction. Temporary roads shall meet the same requirements for
 height, width and imposed loads as permanent roads.
- All required fire hydrants and water systems shall be installed, approved and fully functional prior to any combustible construction.

• Fire department apparatus access is required for each lot.

A written response for this review is required.

Every effort has been made to provide a complete and thorough review of these plans. This review does not relieve the owner, contractor and/or developer from compliance with any and all applicable codes and standards. Any change or revision of this plan will render this review void and will require submittal of the new or revised layout for fire department review.
