

SWPPP COMPLIANCE INSPECTION FORM

1. Is the SWPPP on site and accessible, or is the SWPPP location posted in an obvious place and reasonably accessible (in a short time)? 2. Are erosion control, sediment control, and good housekeeping BMP's installed on the site as shown in the SWPPP? 3. Has the SWPPP been updated to reflect the current site conditions (modifications dated & initialed on site map, new BMPs on site map, discontinued BMPs crossed off site map, new BMP details & spec's in SWPPP, SWPPP amendment Log, etc.)? 4. Are on-site inspections being performed and recorded by a qualified person on a weekly or biweekly basis, reporting items required by permit? (Inspector name &qualifications, weather, problems/repairs, corrective action, new BMPs, removed BMPs, discharges, etc.) 5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector? 6. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silt fence, upgradient boundary diversion, down gradient boundary sediment control, etc.) 7. Is there evidence of sediment discharge such as mud flows or soil deposits from the construction site in downstream locations? 8. Is there evidence of vehicles tracking soil off the construction site? 9. Is there soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a storm drain or water body?	3/3	. 1
