

## **Weber County Development Process**

In an effort to streamline the building permit process, Weber County has produced this packet as a means to assist you in understanding the application procedure and requirements when applying for a building permit. This packet includes the necessary submittal checklists outlining the required information you will need to prepare and provide for a complete building permit submittal.

Prior to any site or construction designs, please contact our office for assistance in determining if the property is considered a "Lot of Record" and if the building lot falls within a potential geologic hazard area. If it is determined that the lot is not considered a "Lot of Record", the subdivision process will need to be approved prior to accepting any development plans. If a potential geologic hazard exists, a site reconnaissance letter or a geologic and geotechnical report addressing the hazards prepared and signed by a qualified geologist and geotechnical engineer will be required at the time of building permit submittal.

The following materials have been included in this application packet for your convenience:

- Building Permit Submittal Checklist
- Building Permit Application
- Example site plan

Incomplete applications will not be accepted, receipted, or processed. In order to adequately process your building permit request, the following materials will be required at the time of submission of your application:

- Complete and Signed Building Permit Application
- All items listed on the attached Submittal Checklist (incomplete applications will not be accepted)
- Geologic and/or geotechnical studies or reports regarding the building lot if it is found to be in a potential geologic-hazardous area
- Other supporting materials as applicable

Weber County requires that adequate proof of culinary and waste water approvals have been received and/or the applicable connection fees have been paid to the servicing providers. These items will not be required at the initial submittal stage; however these items will be required to be submitted to our office prior to the issuance of the building permit.

By following the outlined procedures your applications will be processed and reviewed in the timeliest manner possible. If you have any further questions regarding the required materials, process, or ordinances for building permit applications, please feel free to contact our office at the address and phone number listed below.

## **Residential Building Permit Submittal Checklist**

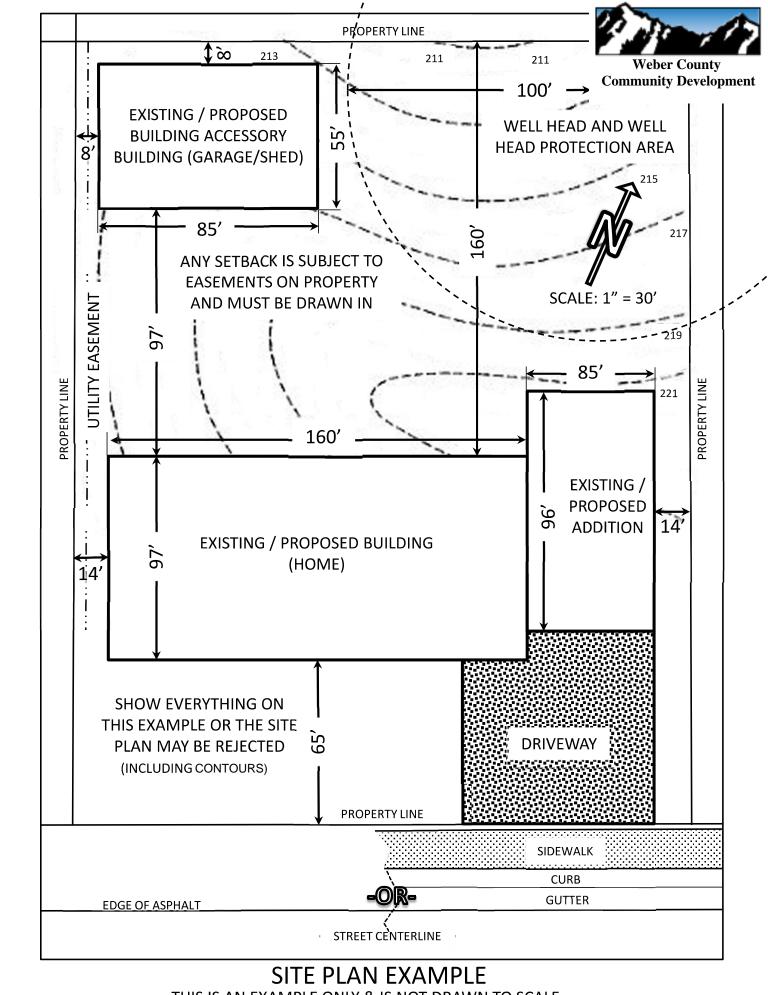

Incomplete applications will not be accepted or held. All required items shall be submitted.

	A lot located in an approved/recorded subdivision or proof of a "Lot of Record" determination
	Geologic site reconnaissance clearing the lot for development or
	*If an engineering geologist deems additional studies are necessary,
	A copy of the final geotechnical and geologic reports stamped, signed and dated by an approved Utah
	State Engineering Geologist and Geotechnical Engineer, if applicable.
	Letter from Structural Engineer stating the plans have been designed to meet the Engineering Geologist and Geotechnical
	Engineer's recommendations, if applicable
	A copy of final, approved Hillside Review, if applicable
	Completed permit application including the signature of the general contractor and or the owner.
	• Must include the name, address and state contractor's license numbers for the General Contractor, Electrical,
	Plumbing and Mechanical sub-contractors.
	Site plans with labels and scale on a PDF
	Site plans shall include, at a minimum, but are not limited to the following information for review:
	<ul> <li>Lot/Parcel Boundary Lines</li> </ul>
	North Arrow
	<ul> <li>Existing site contours</li> </ul>
	<ul> <li>The proposed location of new structure footprint with dimensions from proposed structure to the</li> </ul>
	property lines
	All existing structure footprint locations
	Street (labeled) and driveway location
	<ul> <li>Easements/right-of-ways, if applicable</li> </ul>
	Seasonal or year-round stream corridors
	Complete plans with scale on a PDF.
	All plans shall include, at a minimum, but are not limited to the following information for land use and building
	permit reviews:
	Building elevations (renderings) reflecting natural grade with dimensions showing height measured
	from highest natural grade and the lowest natural grade to the highest point of the coping of a flat roof,
	or to the deck line of a mansard roof, or to the highest point of the ridge of a pitch or hip roof.
	Footing\Foundation plan including all decks/porches/covered patios
	• Floor, Deck and Roof framing plans.
	• Floor plans (all levels)
	<ul> <li>Building sections and Engineered Details.</li> </ul>
	Structural calculations from the Engineer of record
	Energy Conservation Compliance Method:
	o REScheck
	o Other
	SWPPP Storm Water Pollution Prevention Plan (State/Local)
	All engineered, architectural and site plans are to be combined into one PDF file format to scale to be provided on a flash
	drive or on a CD.
The fol	llowing items will not be required at the initial submittal stage; however these items will be required to be submitted
	office prior to the issuance of the building permit:
	Receipt for payment of Fire District Impact Fee and approval of the fire protection system.
	Septic Tank Permit from Weber County Environmental Health Department or authorization to connect to an approved
	wastewater disposal system
	Receipt from an approved culinary water system or an authorization specific to the building lot for connection to the water
	system. An approved and tested well permit from Weber County Environmental Health Department is also permitted.

Weber County Building Permit Application  Incomplete applications will not be accepted or held. All required items shall be submitted.
