

December 13, 2018

Mr. Lowe,

In response to your request concerning replacement water availability, we offer the following. At the present time Weber Basin Water Conservancy District has water available for lease. Our District has the ability to provide water in many areas throughout our District boundaries including the Huntsville area. Please be informed that our water is in high demand and is available on a first come first serve basis. The cost of our replacement water is currently \$474.96 per acre-foot annually. One acre-foot of water is the typical yearly amount for a full-time residence. The Division of Water Rights currently requires 0.45 acre-foot of water for the inside use of a full-time residence and the other 0.55 acre-foot of water can be used for outside irrigation (approximately 0.18 acres) and/or stock watering.

If you should have any further questions, please contact our office.

Thank you,

Kendall Searle
Contracts Administrator & Customer Service Supervisor
