Site Specific Notes

1. Approximately 4200 Sq Ft. will be disturbed during construction.
2. The General Contractor is responsible for monitoring conditions during construction and the maintenance of the SWPPP plan.
3. Install a silt fence around perimeter of construction site to contain dirt and debris during construction as required.
4. All excavated material will be used as fill on site either below concrete floors or as landscaping material surrounding home.
5. The concrete entrance is located near the construction entrance, centrally located on the south side of the lot. The General Contractor is responsible for the maintenance of the concrete entrance.
6. The portable toilet is located near the south east corner of the lot. The portable toilet shall be installed following the manufacturer's instructions.
7. The construction entrance is located directly in front of the barn, on the south side of the lot.
8. In the event that any mud and/or dirt is tracked onto the asphalt roadway, sweep and/or wash away all dirt and dust as required.
9. All rain and storm water on this project site currently drains as indicated on the site plan.
