Ogden, UT 84401

Reference: Sanitary Sewer Feasibility Letter

Dear Mr. Costesso

You have inquired about the feasibility of sanitary sewer service for property located at 4733 W and 1150 S. Central Weber Sewer Improvement District does not have a sanitary sewer line at that location. The nearest sanitary sewer line is on 4300 West (south of the railroad tracks) or 4100 West (north of 12th Street and the railroad tracks). Depending on the chosen route the distance could be between 0.75 miles to 1.25 miles.

Central Weber has no plans to extend sewer lines in this area. That would be left to property owners and developers. Central Weber would consider connection to our existing lines on either 4300 West or 4100 West.

The feasibility of connection might be possible but the distance is great and depth of sewer lines might be another obstacle. There is a possibility that the sewer would need to be pumped. The feasibility of providing sanitary sewer is possible but Central Weber will not accept any responsibility for the cost, construction, maintenance or ownership of collection lines between the property in discussion and Central Weber's sewer lines.

Sincerely,

CENTRAL WEBER SEWER IMPROVEMENT DISTRICT
