To Whom It May Concern:

Landon Hadley has contacted me concerning moving the current private irrigation ditch from its current location and configuration to the west as per the proposed changes on his application to subdivide as part of the Hadley Homestead Subdivision.

I, David Favero, as director for the Taylor Branch of the Hooper Irrigation Company accept the proposed changes to the branch ditch affected by this subdivision. Furthermore, the changes will not impact the access of water from its current state in any way.

Sincerely,

A handwritten signature in cursive script that reads "David Favero".

David Favero
