RE: RW 10-023-885

Dear Mrs. Pfeaster

I have examined our records regarding CenturyLink facilities in lot 34 of Valley Lake Estates phase 3. There is a buried telephone cable along the South side of your property. Qwest has no objections to your building a Shed / Carport (with no footings over the cable), however you will be required to place a 4" schedule 40 conduit running East to West under any concrete (to provide access to cable if a repair was required). You must stay at least 1 foot from the cable. Please allow walkway distance between property line and shed. You will need to call Blue Stakes to have the cable located and hand dig in the easement area.

If you have any questions or need additional information, please call me on 801-626-5380.

Sincerely,

Gary Weaver
CenturyLink Sr. Design Engineer
