

**Written Response for the Murray Flag Lot
Per Fire Marshal Brandon Thueson's request:**

- **Fire Hydrant / Fire Suppression**

The Murray's have requested and received a quote to install a fire suppression system (sprinklers) in their home. Their intention is to have the system installed post framing and prior to any drywall construction.

- **Temporary address marker**

Once the Murray Flag Lot is assigned an address, a temporary address marker will be placed at the entrance of the property (On 7500 West) to identify the property.

- **Fire Access Roads**

The Murrays plan on having an access road to be used to access the property. The road will be approximately 20-30' wide and will be made with a combination of road base and gravel. The road will be made to specifications required (supporting a 75,000 lb load). No obstructions will be placed in the roadway in the 12' high easement.
