NOTES:

- Weber County Land Use Ordinance Section 108-18 "Drinking Water Source Protection" restrictions and development restrictions are in force and effect with this subdivision.
- This subdivision is located in FEMA Flood Zone D. Flood Zone D is a designation of FEMA in which the area affected has not had a flood hazards determination made, additionally, no analysis of flood hazards have been conducted by FEMA.
- Test Pit #3 location was provided by the client with UTM Zone 12 coordinates of N=4569595 E=432871. These were converted to NAD83 Lambert coordinates and expanded to ground using a Combined factor of 1.00029237772456 to plot on this map.

NARRATIVE

- The purpose of this survey is to create a 1 lot subdivision plat as shown hereon. Additionally, the purpose of the survey is to identify utility locations, above or underground, any utilities shown hereon are based on physical survey ties of visible utilities or from 811 Locator Services (Blue Stakes). No representation as to accuracy is made herein. The basis of bearing is as described in the description.
- This survey is building on work that I did while employed by Weber County Surveyor's Office in which I worked with the USFS in establishing the boundary around Pineview Reservoir. It should be noted that the USFS ran out of funding for the project and much of the boundary has not been surveyed. There are some areas around the lake such as the south boundary of this subdivision which monumentation was set but the plat and supporting documentation on the boundary determination was not produced due to lack of funding. While the monumentation, specifically for this subdivision, has not been officially accepted by the USFS, it is my professional opinion that the boundary shown is the USFS boundary for this portion of the lake.
- Records or documents relating to the establishment, research, and evaluation of this portion of the lake boundary are part of the Weber County Surveyor's records and should be available for examination. In regard to the establishment of the boundary there are some basic facts that I will provide herein.
- Noted on the plat is a basic chain of title related to the acquisition of the USA for the expansion of the lake boundary. These documents were recorded in 1959. The relevant one, B632 pg 465, contains a description of the property that creates the boundary around the southern part of this subdivision. The bearings and distances contained in that description are shown for comparison and was known in the condemnation proceedings as Tract No. 15. The bearings of that description were rotated 0°14'36" CCW. I have numbered the monuments for the purposes of this drawing.
- Because of the closing error of the description when holding the location of the NE corner of the Section, which is the tie monument, the description did not coincide with the existing fencing. However, after evaluating the position and bearings of the fence it is obvious that the fence is a close construction of the intent of the condemnation description. The USFS monuments were set in 2012 under my supervision. I am holding this monumented line as the subdivision boundary.
- The establishment of the West boundary of the subdivision was established by splitting the existing fences and holding the rebar monument at the North Quarter of the section. This provides an alignment for the center of the street as well as the Quarter Section line. The South Quarter corner of the section is in the lake and in an attempt to use the BLM plat data to reconstruct their description of the section it was found that there are slight differences between the locations of existing monuments and data noted on the plat. Because of the differences I have held the fence split of the road for the north half of the quarter section line.
- The center of the section identified as calculated on this plat is a result of holding another section of fence that was the south boundary of the Fuller Subdivision (now vacated). This south boundary is also fenced and extending that fence east to intersect with the line of 5900 East Street provides the calculated center quarter corner.
- The north boundary is set at a location to provide the acreage that the owner wants in the plat and is a portion of what they own.
